

# Contents

Chapter 1. Introduction	1
Chapter 2. Notation and Prerequisites	3
2.1 Sets	3
2.2 Functions	6
2.3 Inequalities	12
2.4 Absolute Value	16
Chapter 3. The Basic Definition	19
3.1 The First Version	19
3.2 Second and Third Versions	23
3.3 The Fourth Version	28
3.4 Final Version, or Success at Last	31
Chapter 4. Variations on the Basic Definition	36
4.1 Statements Involving $\infty$	36
4.2 One-sided Limits	43
4.3 Limits of Sequences	47
Chapter 5. Continuity	55
5.1 Preliminary Discussion and Definition	55
5.2 Further Remarks	59
Chapter 6. Some $\delta$ - $\varepsilon$ Techniques	62
6.1 Introduction	62
6.2 Illustrative Examples	63
6.3 Relation Between $\varepsilon$ and Maximum $\delta$	79
Chapter 7. Theorems on Limits and Continuity	82
7.1 The Limit Theorems	82
7.2 Illustrations and Application of the Theorems	92
7.3 Theorems on Sequences	98
7.4 Uniform Continuity	110
7.5 Additional Theorems about a Function Continuous on a Closed Interval	115
Answers	119
Index	135
