Preface	vi
List of symbols	viii
1 Equidissectable polytopes	1
2 Lattice polytopes, lattice point enumerators and a glimpse of algebraic geometry	6
3 Minkowski's fundamental theorem and some of its relatives	14
4 Blichfeldt's theorem	25
5 Successive minima	28
6 The Minkowski–Hlawka theorem	34
7 Mahler's selection theorem	37
8 Packing and covering	40
9 Packing and covering with balls	55
10 Crystallography, tiling and Hilbert's 18th problem	67
11 Geometry of positive quadratic forms: reduction, packing and covering with balls	81
12 Selected problems of number theory	96
13 Visibility	107
14 Lattice point problems of integral geometry	111
15 Applications to numerical analysis	116
16 Lattice graphs	123
17 Extremal combinatorial problems	133
References	139
Subject index	176
Author index	180
