
Contents

Part I Introduction	1
1 The Liar	3
Some background · Diagnosing a paradox · Some basic decisions · Plan of the book · A budget of Liar-like paradoxes	
2 Sentences, Statements, and Propositions	26
Russellian propositions · Austinian statements and propositions · A formal language	
3 The Universe of Hypersets	34
Set theory from Z to A · AFA · The consistency of ZFC/AFA · Solving equations · Inductive and coinductive definitions	
Part II Russellian Propositions and the Liar	59
4 Modeling Russellian Propositions	61
Basic definitions · A Russellian semantics for \mathcal{L}	
5 Truth of Russellian Propositions	75
Truth and the world · The T-schema and the world · Kripke's construction and other closure conditions · Witnessing functions · Paradoxical Russellian propositions	
6 Consequences of the Russellian Account	97
Further examples analyzed · The problem with the Russellian account	
7 Sentences and Russellian Propositions	106
Some proof theory · Paradoxical sentences	

Part III Austinian Propositions and the Liar	119
8 Modeling Austinian Propositions	121
Basic definitions · Truth of Austinian propositions	
9 Austinian Propositions and the World	129
Accessible Austinian propositions · Modeling the Austinian world · The T-schema in the Austinian world	
10 An Austinian Semantics	139
The Austinian semantics for \mathcal{L} · T-closure for expressible propositions · Further examples reanalyzed · The Austinian Completeness Theorem	
11 Relating the Russellian and Austinian Accounts	154
The Liar as a diagonal argument · The Reflection Theorem · Characterizing paradoxical sentences	
12 Negation and Denial	164
13 Conclusions	171
The proper treatment of paradox · Lessons for the skeptic	
Bibliography	179
