<b>INTRODUCTION</b>	1
<b>1. HOMOLOGY THEORIES OVER <math>RP^\infty</math></b>	
A. The category over $RP^\infty$	9
B. Homology with local coefficients	11
C. Homology theories over $RP^\infty$ with coefficients in a module	14
D. Examples	19
E. Cap-products—The Hurewicz homomorphism	21
F. Other homology theories over $RP^\infty$	23
<b>2. POINCARÉ DUALITY—BASIC PROPERTIES</b>	
A. PD-Spaces	25
B. PD-Decompositions	30
C. Smoothing low-dimensional skeleta	39
<b>3. Q-SPACES—POINCARÉ SPACES</b>	
A. A homology theory over BG	58
B. Q-Spaces	62
C. Poincaré spaces	73
D. Poincaré surgeries: preliminaries	77
<b>4. THE POINCARÉ BORDISM GROUPS AND THE EXACT SEQUENCE OF QUINN</b>	
A. Presentation of the results	85
B. Proof of Proposition (4.7)	94
C. Proof of Proposition (4.8)	106
<b>5. SURGERY ON POINCARÉ SPACES</b>	
A. The formal point of view	142
B. Manifold engulfings	152
C. The geometric point of view	161
<b>6. HANDLE DECOMPOSITIONS FOR POINCARÉ SPACES</b>	167

<b>7. THE OBSTRUCTION TO TRANSVERSALITY</b>	
A. Transversality up to Poincaré bordism	174
B. Transversality up to homotopy equivalence	189
<b>8. THE QUINN EXACT SEQUENCE FOR OTHER KINDS OF POINCARÉ SPACES</b>	
A. Simple Poincaré spaces	211
B. A-Poincaré spaces	212
C. Non-finite Poincaré spaces	229
<b>9. OTHER APPLICATIONS</b>	236
<b>APPENDIX. ON FIBRATIONS WITH COMPLEXES HAVING FINITE SKELETA</b>	242
<b>REFERENCES</b>	245
<b>INDEX</b>	251
