## Chapter 1

### Introduction

1.1	Quantum physics and classical electromagnetism . . . . .	1
1.2	Abelian Chern-Simons action . . . . .	5
1.3	Non-Abelian Chern-Simons action . . . . .	6

## Chapter 2

### Basic notions of knot theory

2.1	Ambient and regular isotopy . . . . .	10
2.2	Link invariants . . . . .	14
2.3	Framing and satellites . . . . .	18

## Chapter 3

### Framing in field theory

3.1	Abelian Chern-Simons theory . . . . .	23
3.2	Framed Wilson line operators . . . . .	25

## Chapter 4

### Non-Abelian Chern-Simons theory

4.1	Covariant quantization . . . . .	31
4.2	One-loop effective action . . . . .	34
4.3	Higher order results . . . . .	39

## Chapter 5

### Observables and perturbation theory

5.1	Wilson line operators . . . . .	42
5.2	Perturbative computations . . . . .	44

## Chapter 6

**Properties of the expectation values**

6.1	Holonomy matrix . . . . .	47
6.2	Discrete symmetries . . . . .	49
6.3	Satellite formulae . . . . .	50

## Chapter 7

**Ordering fermions and knot observables**

7.1	Ordering fermions . . . . .	58
7.2	Antiperiodic boundary conditions . . . . .	60
7.3	Knot observables . . . . .	64

## Chapter 8

**Braid group**

8.1	Artin braid group . . . . .	66
8.2	Hecke algebra . . . . .	69

## Chapter 9

**R-matrix and braids**

9.1	Quantum group approach . . . . .	74
9.2	Lie algebras and monodromy representations . . . . .	79
9.3	Quasi-Hopf algebra . . . . .	80

## Chapter 10

**Chern-Simons monodromies**

10.1	Schrödinger picture . . . . .	83
10.2	Universality of the link invariants . . . . .	87
10.3	The inexistent shift . . . . .	90

## Chapter 11

**Defining relations**

11.1	Calculus rules . . . . .	92
------	--------------------------	----

## Chapter 12

**The extended Jones polynomial**

12.1	The values of the unknots . . . . .	102
12.2	Hopf link . . . . .	108
12.3	Trefoil knot . . . . .	110
12.4	Figure-eight knot . . . . .	112
12.5	Connection with the Jones polynomial . . . . .	118

12.6	Bracket connection . . . . .	120
12.7	Reconstruction theorems . . . . .	122

### Chapter 13

#### General properties

13.1	Twist variable . . . . .	127
13.2	Recovered field theory . . . . .	130
13.3	Links in a solid torus . . . . .	133
13.4	Satellites . . . . .	138
13.5	Skein relation . . . . .	141
13.6	Projectors . . . . .	145
13.7	Borromean rings . . . . .	147
13.8	Connected sums . . . . .	153
13.9	Mutations . . . . .	156

### Chapter 14

#### Unitary groups

14.1	Fundamental skein relation . . . . .	161
14.2	Casimir operator . . . . .	164
14.3	Composite states . . . . .	168
14.4	Pattern links . . . . .	172
14.5	Higher dimensional representations . . . . .	176
14.6	Polynomial structure . . . . .	179
14.7	SU(3) examples . . . . .	181

### Chapter 15

#### Reduced tensor algebra

15.1	The restated solution . . . . .	187
15.2	Outlook . . . . .	190
15.3	Representation ring . . . . .	192
15.4	The three-sphere . . . . .	195
15.5	Reduced tensor algebra . . . . .	196
15.6	Roots of unity . . . . .	201
15.7	Special cases . . . . .	204

### Chapter 16

#### Surgery on three-manifolds

16.1	Mapping class group of the torus . . . . .	208
16.2	Solid tori . . . . .	209
16.3	Dehn surgery . . . . .	214
16.4	Links in three-manifolds . . . . .	217

16.5	Elementary surgeries . . . . .	220
16.6	Physical interpretation . . . . .	222
16.7	The fundamental group . . . . .	224

### Chapter 17

#### **Surgery and field theory**

17.1	Basic pairing . . . . .	228
17.2	Properties of the Hopf matrix . . . . .	231
17.3	Elementary surgery operators . . . . .	237
17.4	Surgery operator . . . . .	243
17.5	Surgery rules and Kirby moves . . . . .	246

### Chapter 18

#### **Observables in three-manifolds**

18.1	The manifold $S^2 \times S^1$ . . . . .	249
18.2	The manifold $RP^3$ . . . . .	258
18.3	Lens spaces . . . . .	262
18.4	The Poincaré manifold . . . . .	266
18.5	The manifold $T^2 \times S^1$ . . . . .	269

### Chapter 19

#### **Three-manifold invariant**

19.1	Improved partition function . . . . .	272
19.2	Values of the invariant . . . . .	278

### Chapter 20

#### **Abelian surgery invariant**

20.1	Compact Abelian theory . . . . .	283
20.2	Abelian surgery rules . . . . .	289
20.3	Abelian surgery invariant . . . . .	292
