

Table of Contents

Chapter 1. Complex Geometry and Applications	1
1.1. Nonisotropic Spaces	1
1.2. From Classical to Modern Analysis	17
1.3. Finite Type	26
1.4. Aire on Invariant Metrics	40
1.5. Boundary Limits of Holomorphic Functions	47
1.6. A Geometric Look at the Fatou Theorem	52
1.7. Rigidity of Holomorphic Mappings	68
1.8. Rigidity at the Boundary	75
1.9. The Geometric Theory of Boundary Rigidity of Holomorphic Mappings	87
1.10. Automorphism Groups of Domains	92
1.11. Uniform Estimates for Automorphisms	105
Chapter 2. Function Spaces and Real Analysis Concepts	113
2.1. Bloch Spaces	113
2.2. Normal Functions and Normal Families	120
2.3. H^1 , BMO , and $T(1)$	128
2.4. The Bergman Kernel and Metric	139
2.5. Designing Hardy Spaces	150
2.6. Smoothness of Functions	162
References	179
Index	197
