

Table of Contents

| | |
|---|-----------|
| Introduction | 1 |
| 1 Fundamental structures | 5 |
| 1.1 Convex hull | 7 |
| 1.2 Voronoi diagram | 8 |
| 1.2.1 Voronoi diagram for points in E^d | 8 |
| 1.2.2 Higher order Voronoi diagrams | 9 |
| 1.2.3 Voronoi diagram of line segments | 13 |
| 1.3 Arrangements | 14 |
| 1.3.1 Arrangements of hyperplanes | 15 |
| 1.3.2 Trapezoidal map | 16 |
| 1.4 Geometric transformations | 17 |
| 2 Static randomized incremental algorithms | 21 |
| 2.1 Formalization of the problem | 23 |
| 2.2 A data structure : the conflict graph | 25 |
| 2.3 Techniques of analysis | 26 |
| 2.3.1 Random sampling | 26 |
| 2.3.2 Probabilistic games and Θ series | 32 |
| 2.3.3 Backwards analysis | 32 |
| 3 The Delaunay Tree | 35 |
| 3.1 Structure | 37 |
| 3.2 Constructing the Delaunay triangulation | 39 |
| 3.2.1 Location | 39 |
| 3.2.2 Creating the new simplices | 40 |
| 3.3 Another structure | 42 |
| 4 A general structure : the Influence Graph | 45 |
| 4.1 The general framework | 47 |
| 4.1.1 Randomized analysis of the I-DAG | 48 |
| 4.1.2 Influence graph versus Conflict graph | 51 |
| 4.1.3 Another analysis | 51 |
| 4.1.4 Removing the update conditions | 54 |

| | | |
|----------|---|-----------|
| 4.2 | Locating with the influence graph | 56 |
| 4.2.1 | Faster object location | 56 |
| 4.2.2 | Queries | 56 |
| 4.3 | Applications | 57 |
| 4.3.1 | Convex hulls | 57 |
| 4.3.2 | Arrangements | 61 |
| 4.3.3 | Voronoi diagrams | 66 |
| 4.3.3.1 | Voronoi diagrams of point sites in \mathbb{E}^d | 66 |
| 4.3.3.2 | Voronoi diagrams of line segments in the plane | 69 |
| 4.4 | About complexity results | 72 |
| 4.4.1 | Randomization | 72 |
| 4.4.2 | Amortization | 72 |
| 4.4.3 | Output sensitivity | 74 |
| 5 | The k-Delaunay Tree | 77 |
| 5.1 | The k -Delaunay Tree in two dimensions | 79 |
| 5.1.1 | Including and excluding neighbors | 80 |
| 5.1.2 | A semi-dynamic algorithm for constructing the order $\leq k$ Voronoi diagrams | 82 |
| 5.1.3 | Construction of the k -Delaunay Tree | 82 |
| 5.1.3.1 | Initialization | 82 |
| 5.1.3.2 | Inserting a new site | 83 |
| 5.1.3.3 | Structure of the k -Delaunay Tree | 85 |
| 5.1.3.4 | Procedure location | 86 |
| 5.1.3.5 | Procedure creation | 86 |
| 5.2 | Analysis of the randomized construction | 88 |
| 5.2.1 | Results on triangles and bicycles | 89 |
| 5.2.2 | Analysis of the expected space used by the k -Delaunay Tree | 92 |
| 5.2.3 | Analysis of the expected cost of Procedure location | 92 |
| 5.2.4 | Analysis of the expected cost of Procedure creation | 93 |
| 5.3 | l -nearest neighbors | 93 |
| 5.3.1 | Deducing the order l Voronoi diagram from the k -Delaunay Tree ($l \leq k$) | 94 |
| 5.3.2 | Finding the l nearest neighbors | 94 |
| 5.4 | The k -Delaunay Tree in higher dimensions | 96 |
| 5.4.1 | The d dimensional k -Delaunay Tree | 97 |
| 5.4.2 | Analysis of the randomized construction | 97 |
| 5.5 | Experimental results | 99 |
| 5.5.1 | Influence of randomization | 99 |
| 5.5.2 | Influence of k | 100 |
| 5.5.3 | Influence of the point distribution | 100 |

| | | |
|----------|---|------------|
| 6 | Towards a fully dynamic structure | 109 |
| 6.1 | Removing a site from the Delaunay triangulation | 111 |
| 6.1.1 | Different kinds of modified nodes | 112 |
| 6.1.2 | The Search step | 113 |
| 6.1.3 | The Reinsertion step | 115 |
| 6.1.4 | Analysis | 123 |
| 6.1.5 | d -dimensional case | 126 |
| 6.1.6 | Practical results in the planar case | 126 |
| 6.2 | Removing a segment from an arrangement | 126 |
| 6.2.1 | The Search step | 128 |
| 6.2.2 | Corners and bridges | 129 |
| 6.2.3 | Reinsertion of a triplet (\mathbf{x}, T, F) | 129 |
| 6.3 | Analysis | 134 |
| 7 | Parallel work | 137 |
| 7.1 | Accelerated static algorithms | 139 |
| 7.2 | Semi-dynamic algorithms | 140 |
| 7.3 | Dynamic algorithms | 140 |
| 7.3.1 | With storage of the history | 140 |
| 7.3.2 | Without storing the history | 141 |
| 7.4 | Strategies | 142 |
| | Conclusion | 145 |
| | Bibliography | 151 |
| | Index | 157 |
