Introduction	1
1. The classical logic	5
1.1 Truth-tables	5
1.2 Propositional tautologies	7
1.3 Functional completeness	8
1.4 Axiomatization of CPC	9
1.5 Predicate calculus	11
1.6 Algebraization	12
2. The third logical value of Łukasiewicz	16
2.1 Łukasiewicz and the Lvov-Warsaw school	16
2.2 Three-valued logic	17
2.3 Modality and three-valuedness	19
2.4 Interpretation difficulties	21
3. Logic algebras and matrices	24
3.1 Language and logic algebras	24
3.2 Functional completeness of finite algebras	26
3.3 Logical matrices	28
4. Many-valuedness	30
4.1 Two criteria	30
4.2 Structurality and many-valuedness	32
4.3 Finiteness and deduction	33
5. Łukasiewicz logics	36
5.1 Fundamental properties	36
5.2 Definability in Łukasiewicz matrices	38
5.3 Axiomatization	39
5.4 Algebraic interpretations	40
6. Post logics	44
6.1 Post matrices	44

6.2	Interpretation	46
6.3	Algebraic form of Post logics	47
6.4	Axiomatization of functionally complete systems of n -valued logic	48
7.	Three-valuedness of Kleene and Bochvar	51
7.1	Logic of indeterminacy	51
7.2	Bochvar logic	54
7.3	Partial logics	56
8.	Standard properties of many-valued constructions	60
8.1	Standard conditions	61
8.2	Axiomatization	62
8.3	Standard matrix consequence	63
9.	Probability and many-valuedness	66
9.1	Logical probability	66
9.2	Operationalistic conception of subjective probability	68
10.	Classical characterization of many-valued logics	72
10.1	Suszko's thesis	72
10.2	Scott's method	74
10.3	Urquhart's interpretation	77
11.	Quantifiers in many-valued logic	79
11.1	Ordinary predicate calculi	79
11.2	Set theory and many-valued logic	81
11.3	Generalized quantifiers	83
12.	Intuitionism and the modal logics of Lewis	87
12.1	Intuitionistic logic	87
12.2	Modal logics S4 and S5	91
12.3	Remarks on quantification	95
13.	Fuzzy sets and Zadeh logic	98
13.1	Fuzzy sets and logics of imprecise concepts	98
13.2	Fuzzy logic	101
14.	Applications and significance of the topic	105
14.1	Independence of axioms	105
14.2	Formalization of intensional functions	106

14.3	Many-valued algebras and switching theory	109
14.4	Many-valuedness in computer science	111
	Bibliography	113
	Author index	125
	Subject index	127
