

Contents

Preface	ix
1. Facet Theory: A Strategy for Scientific Theory Building	1
How Does Facet Theory Compare With Traditional Approaches?	2
What Can a Researcher Do With Facet Theory?	3
The Structure of the Book	4
On the Nature of Scientific Inquiry	5
Questions and Their Role in Scientific Inquiry	10

**PART I:
FACET DESIGN:
THE SHAPING OF RESEARCH CONTENTS**

2. Mappings and Assignments	17
Mappings in the Service of Observational Design:	
The Mapping Sentence	21
Power Sets	23
Breaking the Power Set Into Convenient Ranges	24
Converting Range Facets Into Domain Elements	25
Refining the Range	27
3. The Range Facet: An Image of Reality	29
Identically Phrased Ranges	31
The Common Meaning Range	32
Modifiability of the Common Range	35
The Benefits and Uses of the Common Range	38
Common Range as a Basis for Measurement	40
4. Formalization of Research Content Design: Domain Facets	45

Extension and Intension: Two Ways of Expanding the Domain	47
5. Definitions and Hypotheses	56
Definitions	56
Mapping Definitions: Examples	58
Regional Hypotheses	66
6. The Mapping Sentence	70
Exercise in Facet Decomposition	71
The Study of Human Intelligence	74
Mapping Sentences Are Flexible	77
Content Sampling: The Construction and Selection of Representative Items	79
Do Background (Demographic) Variables Have a Role in Theory-Oriented Facet Design of Observations?	82
Conclusion	93

PART II:
INTRINSIC DATA ANALYSIS:
THE STRAIGHT WAY TO HANDLE
MULTIVARIATE DATA

7. Behavioral Theories: Picturing Concepts by Faceted SSA	97
The Representation of Concepts as Physical Spaces	98
Smallest Space Analysis: The Concrete Representation of Abstract Concepts	101
Empirical Examples of the Use of SSA for Hypotheses Testing and Theory Construction	106
Exploratory and Confirmatory SSA	120
How To Do SSA	122
Steps in Carrying out SSA of Multivariate Data for Theoretical and Scaling Purposes	123
Reading and Interpreting SSA	126
Conclusion	132
8. Behavioral Measurement: Multiple Scaling by POSAC/LSA	134
The Meaning of "Scale" in Intrinsic Data Analysis	135

Sociability Profiles: Design Versus Observations	140
Partial-Order Scalograms	142
POSAC: Partial-Order Scalogram Analysis by Base Coordinates	151
How To Do Multiple Scaling by POSAC/LSA	159
Conclusion	167
Solutions to Exercises	171
References	175
Glossary	179
Author Index	181
Subject Index	183
About the Authors	187
