

TABLE OF CONTENTS

Notation and terminology	xi
<i>Chapter 1 Boolean Algebras</i>	
§1 Introduction	1
§2 Formulas	2
§3 Atoms	5
§4 Complete algebras	6
§5 Homomorphism and filters	9
§6 Ultrafilters	15
§7 Extending a homomorphism	18
§8 Chains and antichains	21
Problems	24
<i>Chapter 2 Gaps and Limits</i>	
§1 Introduction	31
§2 Dominance	35
§3 Hausdorff Gaps	40
§4 The Parovičenko theorem	43
§5 Types of gaps and limits	48
Problems	58
<i>Chapter 3 Stone Spaces</i>	
§1 The Stone representation	63
§2 Subalgebras and homomorphisms	68
§3 Zero-sets	69
§4 The Stone-Čech compactification	72
§5 Spaces of uniform ultrafilters	76
§6 Strongly zero-dimensional spaces	80
§7 Extremely disconnected spaces	83
Problems	87

<i>Chapter 4 F-Spaces</i>	
§1 Extending a function	93
§2 Characterization of countable gaps	96
§3 Construction of Parovičenko spaces	98
§4 Closed sets in the space ω^*	104
§5 On the Parovičenko theorem	106
§6 On P -sets in the space ω^*	108
§7 Character of points	117
Problems	121
<i>Chapter 5 π-Base Matrix</i>	
§1 Base tree	123
§2 Stationary sets	132
§3 c -Points	136
Problems	142
<i>Chapter 6 Inhomogeneity</i>	
§1 Kunen's points	143
§2 A matrix of independent sets	148
§3 Countable sets in F -spaces	153
§4 Inhomogeneity of products of compact spaces	157
Problems	159
<i>Chapter 7 Extending of Continuous Functions</i>	
§1 Weak Lindelöf property	161
§2 A long convergent sequence	167
§3 Strongly discrete sets	170
Problems	170
<i>Chapter 8 The Martin Axiom</i>	
§1 Continuous images	179
§2 The space $\beta[\omega_1]$	186
§3 On the Parovičenko theorem	191
§4 Gaps	197
§5 Homomorphisms of $C(X)$	202
Problems	209
<i>Chapter 9 Partitions of Antichains</i>	
§1 Partition algebras	209
§2 Complete algebras	218
§3 Partition algebras under MA	221

§4 More on partition algebras	234
Problems	244
<i>Chapter 10 Small P-Sets in ω^*</i>	
§1 Proper forcing	243
§2 On P -filters with the ccc	256
Problems	264
<i>Chapter 11 Forcing</i>	
§1 Set theory and its models	259
§2 Forcing	275
§3 Complete embeddings	279
§4 Cardinal numbers	281
§5 Selected models	283
§6 Iterated forcing	289
§7 The Martin Axiom	299
Bibliography	294
Index	297
