

# Contents

Introduction . . . . .	1
<b>Part I. Derived category <math>D_G(X)</math> and functors.</b>	
0. Some preliminaries . . . . .	2
1. Review of sheaves and functors . . . . .	5
Appendix A . . . . .	13
2. Equivariant derived categories . . . . .	16
Appendix B. A simplicial description of the category $D_G(X)$ . . . . .	32
3. Functors . . . . .	34
4. Variants . . . . .	40
5. Equivariant perverse sheaves . . . . .	41
6. General inverse and direct image functors $Q^*, Q_*$ . . . . .	43
7. Some relations between functors . . . . .	49
Appendix C . . . . .	56
8. Discrete groups and functors . . . . .	57
9. Almost free algebraic actions . . . . .	66
<b>Part II. DG-modules and equivariant cohomology.</b>	
10. DG-modules . . . . .	68
11. Categories $D_{\mathcal{A}}^f, D_{\mathcal{A}}^+$ . . . . .	83
12. DG-modules and sheaves on topological spaces . . . . .	93
13. Equivariant cohomology . . . . .	115
14. Fundamental example . . . . .	121
<b>Part III. Equivariant cohomology of toric varieties.</b>	
15. Toric varieties . . . . .	126
Bibliography . . . . .	133
Index . . . . .	135
