Preface .....	xi
Reader's Guide .....	xiii
Introduction .....	1
History .....	5
<b>Part P PRELIMINARIES</b> .....	<b>9</b>
1. Binomials and Cyclotomic Polynomials .....	9
2. The Cyclotomic Field .....	27
3. The Pythagorean Equation, Special Cases of Fermat's Last Theorem and Related Equations .....	31
4. Continued Fractions .....	55
5. The Equations $EX^2 - DY^2 = \pm C$ .....	60
<b>Part A SPECIAL CASES</b> .....	<b>67</b>
1. Preliminary Lemmas .....	67
2. The Sequence of Squares or Cubes .....	69
3. The Equation $X^m - Y^2 = 1$ .....	78
4. The Result of Størmer on Fermat's Equation .....	80
5. The Attempts to Solve $X^2 - Y^n = 1$ .....	89
6. The Equation $X^2 - Y^n = 1, n \geq 3$ .....	92

7. The Equations $X^3 - Y^n = 1$ and $X^m - Y^3 = 1$ , with $m, n \geq 3$ .....	96
8. The Equation $\frac{X^n - 1}{X - 1} = Y^m$ .....	110
9. The Sequence of Powers of 2 or 3 .....	124
10. Interlude .....	127
11. The Equation $2X^n - 1 = Z^2$ .....	129
12. $\pi$ and Gravé's Problem.....	132
13. A Problem of Fermat on Pythagorean Triangles and the Equation $2X^4 - Y^4 = Z^2$ .....	144
14. The Equations $X^4 \pm 2^m Y^4 = \pm Z^2$ and $X^4 \pm Y^4 =$ $2^m Z^2$ .....	164
15. Representation of Integers by Binary Cubic Forms.....	177
16. Some Quartic Equations .....	192

## **Part B DIVISIBILITY CONDITIONS**..... 201

1. Getting the Consecutive Powers 8 and 9 .....	201
2. The Theorem of Cassels and First Consequences .....	204
3. Prime Factors of Solutions of Catalan's Equation .....	214
4. The Theorem of Hyrö .....	216
5. The Theorems of Inkeri.....	219

## **Part C ANALYTICAL METHODS**..... 241

1. Some General Theorems for Diophantine Equations ....	241
I. The Equation $X^m - Y^n = 1$ .....	247
2. Upper Bounds for the Number and Size of Solutions ...	247
3. Lower Bounds for Solutions.....	256
4. Algorithm to Determine the Eventual Solutions .....	266
II. The Equation $a^U - b^V = 1$ .....	269
5. What Will Be Discussed.....	269
6. Finiteness of the Number of Solutions.....	271
7. Algorithm to Determine the Eventual Solutions .....	282
8. The Largest Prime Factor of Values of Quadratic Polynomials .....	283
9. Effective Results.....	288
III. The Equation $X^U - Y^V = 1$ .....	298

10. The Theorem of Tijdeman .....	298
11. A Density Result .....	308
<b>Appendix 1. Catalan's Equation in Other Domains .....</b>	<b>313</b>
(A) Catalan's Equation over Number Fields .....	313
(B) Catalan's Equation over Fields $K(t)$ and Domains $K[t]$ .....	314
(C) Catalan's Equation Over Function Fields of Projective Varieties .....	318
<b>Appendix 2. Powerful Numbers .....</b>	<b>319</b>
(A) Distribution of Powerful Numbers .....	320
(B) Additive Problems .....	322
(C) Difference Problems .....	323
<b>Bibliography .....</b>	<b>331</b>
Index of Names .....	359
Subject Index .....	363
