<b>Preface</b>	<b>9</b>
Part I	
The $L^2$ -moduli space for manifolds with cylindrical ends	
<b>Chapter 1. Introduction: The <math>L^2</math>-moduli space</b>	<b>17</b>
<b>Chapter 2. Chern-Simons flow and ASD connections on a cylinder</b>	<b>23</b>
2.1. The basics of the Chern-Simons function	24
2.2. The relationship with the ASD Equation on the cylinder	26
2.3. Slices for the gauge group action on $A(\eta)$	28
2.4. Connections on $[0, \infty) \times N$ and paths in $B(N)$	30
2.5. The restriction of the Chern-Simons function to a slice through a flat connection	33
2.5.1. Estimates on the nonlinearity of $\nabla f_\Gamma$	36
2.6. The flow equation on a slice determined by the ASD Equation	38
<b>Chapter 3. Regularity and Estimates for the Flow Equation: The Proof of Theorem 2.6.3</b>	<b>43</b>
3.1. Putting Sobolev connections in standard form	43

<b>3.2. Estimates for <math>g</math>-ASD connections in standard form</b>	<b>47</b>
<b>3.3. Regularity for ASD connections in standard form</b>	<b>50</b>
<b>3.4. Completion of the proof</b>	<b>56</b>
<b>3.5. Related estimates</b>	<b>56</b>
<b>Chapter 4. Existence of asymptotic value at infinity</b>	<b>59</b>
<b>4.1. Weak convergence to the character variety</b>	<b>60</b>
<b>4.2. L. Simon's theorems on asymptotics</b>	<b>62</b>
<b>4.3. Strong convergence to the character variety</b>	<b>65</b>
<b>4.4. Proof of Theorem 4.0.1</b>	<b>70</b>
<b>4.5. Existence of limit connection implies finite energy</b>	<b>71</b>
<b>4.6. The moduli space based at infinity</b>	<b>72</b>
4.6.1. The case when $N$ is not connected	75
<b>4.7. Uniform bounds</b>	<b>75</b>
<b>Chapter 5. The finite dimensional ODE dominating the Chern-Simons flow</b>	<b>77</b>
<b>5.1. Existence of the center manifold</b>	<b>78</b>
<b>5.2. Exponential approach to the center manifold: the statement</b>	<b>82</b>
<b>5.3. Approximate solutions in the center manifold</b>	<b>86</b>
<b>5.4. <math>L^2</math>-exponential approach to the center manifold</b>	<b>89</b>
<b>5.5. Proof of Theorem 5.2.2</b>	<b>92</b>
5.5.1. The proof of existence of the map $\tilde{Y}_S$	92
5.5.2. The proof of continuity of $\tilde{Y}_S$	95
<b>5.6. Weighted Sobolev space continuity of <math>\omega - \tilde{\omega}</math></b>	<b>98</b>

<b>Chapter 6. Geometric limits as we stretch the tube out</b>	<b>101</b>
<b>6.1. General geometric limits</b>	<b>101</b>
6.1.1. Uhlenbeck's compactness theorem	103
<b>6.2. Stretching the neck</b>	<b>103</b>
<b>6.3. Convergence without loss of energy on long tubes</b>	<b>105</b>
6.3.1. Compatible boundary values	105
6.3.2. The effect of extra base points	106
6.3.3. The main compactness theorem	107
<b>Part II</b>	
The Thickened moduli space	
<b>Chapter 7. The definition of the thickened moduli space</b>	<b>113</b>
<b>7.1. <math>\delta</math>-decaying forms</b>	<b>115</b>
<b>7.2. Spaces of connections asymptotic to flow lines for a truncation of <math>\Xi_\Gamma</math></b>	<b>116</b>
7.2.1. The truncated vector field $\Xi_\Gamma^{tr}$	117
7.2.2. The space of connections	120
7.2.3. The gauge group and the quotient space	121
7.2.4. Connections $\delta$ -decaying to flat connections	123
7.2.5. The map to the space of $L^2_{2,loc}$ connections modulo gauge equivalence	123
<b>7.3. The thickened moduli space associated to a truncation of <math>\Xi</math></b>	<b>124</b>
<b>7.4. The relationship between the <math>L^2</math>-moduli space and the thickened moduli space</b>	<b>125</b>
<b>7.5. The <math>\mu</math>-map for the thickened moduli space</b>	<b>127</b>
<b>Chapter 8. Structure of the fibers of <math>p^0: \mathcal{M}_{\ell,w}^0(\mathcal{T}_\Gamma, T_0, g) \rightarrow \mathcal{H}_\Gamma^0</math></b>	<b>131</b>
<b>8.1. The fiber over a point</b>	<b>131</b>

<b>8.2. The deformation complex for the fibers of <math>p</math> and expansions for the <math>\delta</math>-decaying operators</b>	<b>132</b>
<b>8.3. Fredholm theory of the operators <math>D_{\omega,\delta}</math></b>	<b>134</b>
<b>8.4. Index computations for the fibers</b>	<b>136</b>
<b>8.5. The deformation complex for the thickened moduli space</b>	<b>138</b>
8.5.1. The case of partial boundary conditions	140
<b>8.6. The local structure of the <math>L^2</math> and thickened moduli spaces</b>	<b>140</b>
<b>8.7. The cohomology groups of the fiber and base complex when <math>\omega</math> is flat</b>	<b>141</b>
<b>8.8. On orientations of the moduli spaces when <math>G = SU(2)</math></b>	<b>144</b>
8.8.1. The group of components of the gauge group and the fundamental group of the quotient	144
8.8.2. Orientability of the fibers $M_{\ell,w}(h, T_\Gamma, T_0, g)$	145
8.8.3. Orienting the fiber complex $F_\delta(\omega)$	146
8.8.4. Orientation of the thickened moduli space	147
<b>Chapter 9. A generic metrics theorem for the thickened moduli space when <math>G = SU(2)</math> or <math>SO(3)</math></b>	<b>149</b>
<b>9.1. Perturbations of the based moduli space</b>	<b>150</b>
<b>9.2. Reducible connections</b>	<b>152</b>
<b>9.3. Comparison with <math>\partial^0</math></b>	<b>156</b>
<b>9.4. The divisors <math>\mu(\alpha)</math> in the thickened moduli space</b>	<b>157</b>
<b>Chapter 10. Slices and the local structure of <math>B_{\ell,w}^0(T_\Gamma, T_0)</math></b>	<b>159</b>
<b>10.1. A product structure for <math>A_{\ell,w}(T_\Gamma, T_0)</math></b>	<b>159</b>
<b>10.2. Basic Results for <math>d_\omega</math> and <math>\Delta_{\omega,\delta}</math></b>	<b>160</b>

<b>10.3. The Slice Theorem and the Topology of the Quotient Space</b>	<b>162</b>
Part III	
Circle Bundles Over Riemann Surfaces	
<b>Chapter 11. Generalities on Stratified Spaces</b>	<b>171</b>
<b>Chapter 12. The relationship of the center manifold to the Kuranishi picture for a general 3-manifold</b>	<b>175</b>
<b>12.1. The Kuranishi Picture</b>	<b>175</b>
<b>12.2. The comparison of the vector fields</b>	<b>179</b>
<b>12.3. Comparison of the flows of quadratically close vector fields</b>	<b>181</b>
<b>Chapter 13. Local data for the representation variety</b>	<b>183</b>
<b>13.1. The fundamental group and its representations into <math>SU(2)</math></b>	<b>183</b>
13.1.1. The Zariski tangent space	185
<b>13.2. An approximate Kuranishi map</b>	<b>186</b>
13.2.1. The Kuranishi picture for a Riemann Surface	188
<b>13.3. The Kuranishi picture for <math>N</math></b>	<b>190</b>
<b>13.4. Chern-Simons and <math>\rho</math> Invariants</b>	<b>193</b>
<b>Chapter 14. The moduli space</b>	<b>199</b>
<b>Chapter 15. The case of <math>SO(3)</math> moduli spaces</b>	<b>207</b>
<b>Chapter 16. A Vanishing Result for 4-manifolds split by certain 3-dimensional nilmanifolds</b>	<b>209</b>
<b>Bibliography</b>	<b>219</b>
<b>Index</b>	<b>221</b>
