

About Hyperproof	xiii
How to use this book	xiv
With LoFOL	xiv
With <i>Tarski Lite</i>	xv
Acknowledgements	xvi
A note to instructors	xvii
I Basic Concepts	1
1 Comparing Tarski's World and Hyperproof	3
1.1 Worlds and situations	4
1.2 A new property and relation	7
1.3 Language differences	9
1.4 Kleene evaluation	11
1.5 Proofs	15
2 Proofs of Consequence and Nonconsequence	20
2.1 Observe	21
2.2 Assume	23
2.3 Check Truth of the Assumptions (CTA)	28
2.4 Sentence goals	31
Summary of sentence goals	37
Strategy and tactics	37
3 Sentential Consequence Rules	42
3.1 Tautological Consequence	42
3.2 Logical Consequence	50
Strategy and tactics	54

3.3	Analytic Consequence	56
4	Proofs of Consistency and Inconsistency	60
4.1	Syntactic Close	62
4.2	Semantic Close	64
4.3	Consistency goals	66
	Summary of consistency goals	67
	Strategy and tactics	68
II	Diagrammatic Reasoning	73
5	The Apply Rule	75
5.1	Apply	76
	Strategy and tactics	80
5.2	Some situation goals	81
	Strategy and tactics	83
6	Reasoning by Cases	87
6.1	Cases Exhaustive	87
	Strategy and tactics	93
6.2	Merge and Inspect	96
	Strategy and tactics	101
6.3	Recursive Close	104
	Strategy and tactics	106
6.4	Name	107
	Strategy and tactics	110
6.5	Review exercises	111
7	Independence Proofs	114
7.1	Consequence, nonconsequence and independence	114
7.2	More independence goals	117
	Summary of some situation goals	117
	Strategy and tactics	120
7.3	Constrained independence and consequence	122
7.4	Some final situation goals	124
	Summary of remaining situation goals	127
7.5	Review exercises	129

III Sentential Reasoning	133
8 Sentence Connective Rules	135
8.1 Conjunction rules	136
8.2 Disjunction rules	140
Disjunctive Close	143
8.3 Negation rules	145
Strategy and tactics	148
8.4 Conditional rules	153
Strategy and tactics	156
8.5 Biconditional rules	158
Strategy and tactics	159
8.6 Matters of style	160
9 Quantifier and Identity Rules	164
9.1 Identity rule	164
9.2 Existential quantifier rules	167
Existential Close	172
9.3 Universal quantifier rules	174
Strategy and tactics	178
9.4 Multiple quantifiers	182
9.5 Numerical quantifier rules	184
9.6 Review Exercises	188
10 Axioms and Analytic Consequence	191
10.1 The axiomatic method	191
10.2 Axiomatizing shape	194
10.3 Axiomatizing size	201
10.4 Location axioms	205
11 Logic and Observation	212
Appendices	218
A Using Hyperproof	218
A.1 Launching the program	218
A.2 Editing the situation	221
A.3 The body of the proof	224
A.4 Goals	232
A.5 Copying and pasting	233
A.6 Printing proofs	236

A.7	Function keys	236
A.8	Setting up problems	236
A.9	Projecting Hyperproof in class	238
B	Summary of Goals	239
C	The LoFOL Proof System	244
	Index	247
	Index of Try Me Files	254
