Preface	VII
0. Preliminaries	1
1. The Ehrenfeucht-Fraïssé Method	13
1.1 Elementary Classes	13
1.2 Ehrenfeucht's Theorem	15
1.3 Examples and Fraïssé's Theorem	20
1.4 Hanf's Theorem	26
1.5 Gaifman's Theorem	30
2. More on Games	37
2.1 Second-Order Logic	37
2.2 Infinitary Logic: The Logics $L_{\infty\omega}$ and $L_{\omega_1\omega}$	40
2.3 The Logics FO^s and $L_{\infty\omega}^s$	46
2.3.1 Pebble Games	48
2.3.2 Examples and Applications	52
2.3.3 Scott Formulas	54
2.4 Logics with Counting Quantifiers	57
2.5 Failure of Classical Theorems in the Finite	61
3. 0–1 Laws	71
3.1 0–1 Laws for FO and $L_{\infty\omega}^\omega$	71
3.2 Parametric Classes	74
3.3 Unlabeled 0–1 Laws	77
3.3.1 Appendix	81
3.4 Examples and Consequences	84
3.5 Probabilities of Monadic Second Order Properties	88
4. Satisfiability in the Finite	97
4.1 Finite Model Property of FO^2	97
4.2 Finite Model Property of $\forall^2\exists^+$ -Sentences	102

5. Finite Automata and Logic: A Microcosm of Finite Model Theory	107
5.1 The Main Theorem	107
5.2 Word Models	110
5.3 Examples and Applications	113
5.4 First-Order Definability	115
6. Descriptive Complexity Theory	119
6.1 Some Extensions of First-Order Logic	120
6.2 Turing Machines and Complexity Classes	124
6.2.1 Digression: Trahtenbrot's Theorem	127
6.2.2 Structures as Inputs	129
6.3 Logical Descriptions of Computations	133
6.4 The Complexity of the Satisfaction Relation	146
6.5 The Main Theorem and Some Consequences	150
6.5.1 Appendix	160
7. Logics with Fixed-Point Operators	165
7.1 Inflationary and Least Fixed-Points	165
7.2 Simultaneous Induction and Transitivity	175
7.3 Partial Fixed-Point Logic	189
7.4 Fixed-Point Logics and $L_{\infty\omega}^{\omega}$	195
7.4.1 Digression: The PFP _{P_{TIME}} Logic and Fixed-Point Logic with Counting.	201
7.5 Fixed-Point Logics and Second-Order Logic	207
7.5.1 Digression: Implicit Definability	213
7.6 Transitive Closure Logic	216
7.6.1 FO(DTC) < FO(TC)	218
7.6.2 FO(posTC) and Normal Forms	220
7.6.3 FO(TC) < FO(LFP)	225
7.7 Bounded Fixed-Point Logic	231
8. Logic Programs	235
8.1 DATALOG	235
8.2 I-DATALOG and P-DATALOG	241
8.3 A Preservation Theorem	245
8.4 Normal Forms for Fixed-Point Logics	249
8.5 Arity Hierarchies of Fixed-Point Logics	258
9. Optimization Problems	265
9.1 Polynomially Bounded Optimization Problems	265
9.2 Approximable Optimization Problems	270

10. Quantifiers and Logical Reductions	275
10.1 Lindström Quantifiers	276
10.2 PTIME and Quantifiers	281
10.3 Logical Reductions	288
10.4 PTIME and Quantifiers Revisited	298
10.5 Quantifiers and Oracles	302
References	313
