<i>Preface</i>	<i>page</i>	<i>ix</i>
Introduction		1
1 Introduction to the Brouwer and Leray–Schauder Degrees, A-Proper Mappings, and Linear Theory		5
1.1 Definition of the Brouwer Degree for C Functions in \mathbb{R}^N and Some Properties		5
1.2 Some Applications		7
1.3 Approximation Schemes, Definitions, and Some Examples of A-Proper Mappings		12
1.4 Further Examples of A-Proper Mappings and Some Constructive Solvability Results		16
1.5 Leray–Schauder Degree and Some of Its Properties		22
1.6 Additional Properties, Constructive Solvability, Fredholm Property of A-Proper Linear Maps		24
2 Generalized Degree for Densely Defined A-Proper Mappings, with Some Applications to Semilinear Equations		29
2.1 Introductory Remarks of an Historical Nature		29
2.2 Definition of the Generalized Degree for Densely Defined A-Proper Mappings		30
2.3 Fixed Point Index for P_1 -Compact Maps		37
2.4 Some Results Using Generalized Degree in Solving Semilinear Equations		40
2.5 New Approach to the Solvability of Semilinear Equations		50

2.6	Global Bifurcation Involving A-Proper Maps	55
2.7	Parity and Bifurcation Involving C^1 Maps	57
3	Solvability of Periodic Semilinear ODEs at Resonance	65
3.1	Application to Periodic ODEs of Order 2	65
3.2	Special Cases	72
3.3	Application to ODEs of Order $n > 2$	80
3.4	Further Application to Higher-Order Equations at Resonance	96
3.5	Global Bifurcation of Second-Order Equations with Parameter	106
4	Semiconstructive Solvability, Existence Theorems, and Structure of the Solution Set	111
4.1	Rothe-Type Results for P_1 -Compact Maps	111
4.2	Extension of Results of the Landesman-Lazer Type	116
4.3	Fredholm Alternative and Perturbation Results	125
4.4	New A-Proper Mapping Results	134
4.5	Improved Solvability Results in Terms of Γ_m	140
4.6	Structure of the Solution Set and Some Applications	149
5	Solvability of Semilinear PDEs at Resonance	161
5.1	Weak or Variational Solvability of Elliptic Equations	162
5.2	Special Cases	168
5.3	Strong Solvability of Elliptic Equations	175
5.4	Nonresonance and Existence for Semilinear BVPs	184
5.5	Special Problems	192
5.6	Existence of an Unbounded Set of Solutions of Semilinear PDEs and Its Covering Dimension	202
	<i>Appendix</i>	215
	<i>References</i>	225
	<i>Index</i>	239
