

Contents

1 Introduction	1
2 Differential Geometry	6
2.1 Differential manifolds	6
2.2 Metrics and connections	19
2.3 Cohomology	33
3 Matrix Geometry	39
3.1 Differential forms I	39
3.2 Differential forms II	48
3.3 Tensor products	53
3.4 Metrics	56
3.5 Connections	61
3.6 Cohomology	66
4 Noncommutative Geometry	68
4.1 General algebras	69
4.2 Quantum groups	83
4.3 Quantum spaces	92
4.4 Superalgebras	95
5 Vector Bundles	98
5.1 K -theory	98
5.2 A matrix analogue	114
5.3 Fredholm modules	117
6 Cyclic Homology	127
6.1 The differential envelope	127
6.2 Cyclic homology	135
6.3 Morita equivalence	140
6.4 The Loday-Quillen theorem	141
7 Modifications of space-time	144
7.1 The Manin plane	145
7.2 The fuzzy sphere	145
7.3 Fuzzy physics	154
8 Extensions of space-time	169
8.1 The spinning particle	169
8.2 Noncommutative electrodynamics	173
8.3 Modified Kaluza-Klein theory	180
Bibliography	190
Index	198
