<i>Preface</i>	vii
<b>1 Elements of Vector Algebra</b>	1
1.1 Introduction	2
1.2 Elementary operations with vectors	5
<i>Exercises</i>	12
1.3 Elementary applications of vectors	13
<i>Exercises</i>	23
1.4 Orthogonal and perpendicular projections of a vector	25
1.5 The scalar product	27
<i>Exercises</i>	32
1.6 The vector product	33
<i>Exercises</i>	43
1.7 Applications of vectors to forces	44
1.8 Introduction to the vector analysis of stress ( <i>optional</i> )	47
<i>Exercises</i>	55
1.9 Triple products	55
<i>Exercises</i>	58
<i>Additional exercises</i>	59
Summary	60
Supplement 1S.1 Index notation	62
<b>2 Parametric Equations of Curves and Surfaces</b>	70
2.1 Curves	71
2.2 Surfaces	73
2.3 The vector equation of a curve	77
<i>Exercises</i>	78
2.4 The derivative of a vector	79
2.5 Properties of the derivatives of a vector	82
2.6 Unit tangent vectors	86
<i>Exercises</i>	88
2.7 Simple geometry of curves	89
	xi

2.8	The normal to a planar curve	95
2.9	The normal to a surface	96
	<i>Exercises</i>	99
	<i>Additional exercises</i>	100
	Summary	102
	Supplement 2S.1 Differential geometry	104
	Supplement 2S.2 Impulsive forces	107
<b>3</b>	<b>Scalar and Vector Fields</b>	111
3.1	Scalar fields	111
3.2	The directional derivative	113
	<i>Exercises</i>	116
3.3	Introduction to the vector analysis of strain ( <i>optional</i> )	117
3.4	Vector fields	124
	<i>Exercises</i>	126
3.5	The divergence and curl of a vector field	128
3.6	Properties of gradient, divergence and curl	130
	<i>Exercises</i>	135
3.7	Divergence in elasticity theory ( <i>optional</i> )	136
	<i>Additional exercises</i>	137
	Summary	138
	Supplement 3S.1 Index notation	141
	Supplement 3S.2 Harmonic functions and the torsion problem	142
<b>4</b>	<b>Line, Surface and Volume Integrals</b>	146
4.1	Introduction	147
4.2	Line integrals	147
4.3	Evaluation of line integrals in two dimensions	150
	<i>Exercises</i>	154
4.4	Path dependence of line integrals	155
4.5	Line integrals in three dimensions	162
	<i>Exercises</i>	170
4.6	Occurrence of surface integrals	171
4.7	Evaluation of elementary surface integrals	174
4.8	Cylindrical and spherical coordinate systems	179
4.9	Evaluation of surface integrals by projection	186
	<i>Exercises</i>	191
4.10	Volume integrals	192
4.11	Worked examples on volume integrals	195
	<i>Exercises</i>	201
	<i>Additional exercises</i>	202
	Summary	204
	Supplement 4S.1 Surface integrals in elasticity theory	205

<b>5</b>	<b>Integral Theorems of Vector Analysis</b>	211
5.1	Introduction	212
5.2	Outline derivation of the divergence theorem	212
5.3	Worked examples using the divergence theorem	216
5.4	A general definition of divergence	219
	<i>Exercises</i>	222
5.5	Continuity equations and heat conduction	223
5.6	The divergence theorem and strain energy ( <i>optional</i> )	225
5.7	Outline derivation of Stokes' theorem	227
5.8	Worked examples using Stokes' theorem	233
5.9	A general definition of curl	236
5.10	Conservative vector fields revisited	237
	<i>Exercises</i>	240
5.11	Further consequences of the integral theorems	241
	<i>Additional exercises</i>	244
	Summary – an overview of integration	245
<b>6</b>	<b>Orthogonal Coordinate Systems</b>	249
6.1	Curvilinear coordinates	249
	<i>Exercises</i>	258
6.2	The gradient in generalized coordinates	258
	<i>Exercises</i>	261
6.3	Line, surface and volume elements	261
6.4	Divergence and curl in orthogonal curvilinear coordinates	269
	<i>Exercises</i>	275
	<i>Additional exercises</i>	276
	Summary	277
<b>7</b>	<b>Applications of Vector Field Theory in Electromagnetism</b>	279
7.1	Introduction	279
7.2	The continuity equation again	280
7.3	Maxwell's equations for the electromagnetic field	282
	<i>Exercises</i>	287
7.4	Time-varying fields and potentials	288
7.5	The Poynting vector	291
7.6	Wave solutions of the Maxwell equations	293
	<i>Exercises</i>	300
	<i>Additional exercises</i>	301
	Summary	302
<b>8</b>	<b>Vectors and Rotation</b>	304
8.1	Finite rotations	304
8.2	Infinitesimal rotations and angular velocity	313
	<i>Exercises</i>	315
8.3	Rotating frames of reference	316

8.4	The Coriolis force	323
	<i>Exercises</i>	329
	<i>Additional exercises</i>	330
	Summary	331
<b>Appendix 1</b>	<b>Determinants</b>	333
	A1.1 Second-order determinants	333
	A1.2 Third-order determinants	333
	A1.3 Determinants and index notation	334
<b>Appendix 2</b>	<b>Double Integration</b>	337
	A2.1 Introduction	337
	A2.2 Evaluation of double integrals	338
<b>Appendix 3</b>	<b>Some Historical Notes on Vector Analysis</b>	348
	A3.1 Hamilton's quaternions	348
	A3.2 Grassmann's calculus of extension	350
	A3.3 The work of Maxwell	351
	A3.4 Modern vector analysis	352
	A3.5 Other contributions	354
	<i>Answers and Hints to Exercises</i>	355
	<i>Worked Solutions to Additional Exercises</i>	364
	<i>Index</i>	403
