

Table of contents

Table of contents	v
Introduction	xi
1 Differential calculus and integrals	1
1.1 Introduction : Kock-Lawvere Axiom	1
1.1.1 Introduction	1
1.1.2 Notes on logic	2
1.1.3 A few remarks on infinitesimals	4
1.1.4 Euclidean \mathbb{R} -modules	5
1.2 The rudimentary differential calculus	6
1.2.1 The notion of derivative	6
1.2.2 A Taylor formula	8
1.2.3 Functions of several variables	11
1.2.4 Application : a study of homogeneity	15
1.3 The rudimentary integral calculus	17
1.3.1 Preorder	17
1.3.2 Integral on the interval $[0, 1]$	19
1.3.3 Integral on an interval $[a, b]$	21
1.3.4 A few applications of the axiom of integration	24
1.4 Commented bibliography	30
2 Weil algebras and infinitesimal linearity	33
2.1 Weil algebras	33
2.1.1 Introduction	33
2.1.2 Weil algebras	34
2.1.3 The general Kock axiom	41

2.2	The general microlinearity of R	43
2.2.1	The wonderful myopia of R	43
2.2.2	Quasi colimits of small objects	50
2.2.3	Perception by R of quasi-colimits of small objects	55
2.3	General microlinearity	57
2.3.1	The notion of general microlinearity	57
2.3.2	A few elementary consequences of general micro- linearity	57
2.4	Commented bibliography	59
3	Tangency	61
3.1	Tangent bundle	61
3.1.1	The tangent module at a point	61
3.1.2	Vector bundle and tangent bundle	66
3.2	Vector fields	68
3.2.1	The R -modules of vector fields	68
3.2.2	Lie algebra of vector fields	71
3.3	Derivations	76
3.3.1	Directional derivatives	76
3.3.2	Reflexive objects	80
3.4	Micro-squares	87
3.5	Commented bibliography	100
4	Differential forms	101
4.1	Differential forms with values in an R -module	101
4.1.1	Singular definition	101
4.1.2	Classical differential forms	104
4.2	The exterior differential	108
4.2.1	Infinitesimal n -chains	108
4.2.2	Integral of a n -form on an infinitesimal n -chain	110
4.2.3	The exterior differential	112
4.3	Integral of differential forms	117
4.3.1	Integral of a n -form on an n -interval	117
4.3.2	Stokes formula	120
4.4	The exterior algebra of differential forms	123
4.4.1	Multilinear forms	123
4.4.2	The exterior product	124

4.4.3	Interior products. Lie derivatives	126
4.5	De Rham's Theorem	131
4.5.1	Integration as a cochain morphism	131
4.5.2	The differentiation morphism D	132
4.5.3	Complements	136
4.6	Commented bibliography	139
5	Connections	141
5.1	Connection, covariant derivative and spray	141
5.1.1	Introduction and definition	141
5.1.2	Covariant derivative	147
5.1.3	Sprays	151
5.2	Vertical and horizontal microsquares	158
5.2.1	Vertical-horizontal decomposition	158
5.2.2	Connecting mappings or connection forms	161
5.2.3	Parallel transport	164
5.3	Torsion and curvature	166
5.3.1	Differential forms with value in a tangent fibre bundle	166
5.3.2	Torsion	169
5.3.3	Curvature	173
5.4	Commented bibliography	180
6	Global actions	181
6.1	Lie objects	181
6.1.1	Definition of Lie objects	181
6.1.2	Differential forms	183
6.1.3	Connections	191
6.1.4	Extensions of connections and actions	193
6.2	Curvature of a connection on E and torsion of a connection on L	196
6.2.1	Curvature of a connection	196
6.2.2	Bianchi identity	200
6.2.3	Torsion of a connection on L	201
6.3	Weil's characteristic homomorphism	204
6.3.1	Algebraic preliminaries	204
6.3.2	A derivation formula	205

6.3.3	The Weil homomorphism	209
6.4	Commented bibliography	210
7	On the algebra of the geometry of mechanics	211
7.1	Structured Lie objects	211
7.1.1	The Riemannian case	211
7.1.2	Pre-symplectic and symplectic structures	216
7.1.3	Complex situations	226
7.1.4	Hermitian and Kaelherian objects	230
7.2	Lie algebras of Lie groups	233
7.2.1	Lie groups and Lie algebras	239
7.2.2	Elementar linear examples	241
7.2.3	Global examples of Lie groups and Lie algebras	243
7.2.4	Actions of Lie groups	248
7.3	The cotangent bundle	254
7.3.1	Vector fields on a vector bundle	254
7.3.2	Symplectic structure on cotangent bundle	259
7.3.3	The case of R^n	265
7.4	Commented bibliography	267
8	Note on toposes and models of S.D.G.	269
8.1	Multisorted language of higher order	269
8.1.1	The language	269
8.1.2	Terms and formulas	271
8.1.3	Propositional calculus	272
8.1.4	Predicate calculus	276
8.1.5	Higher order theory	278
8.2	The concept of topos	279
8.2.1	(Insufficient) introduction to categories	279
8.2.2	Definition and examples of toposes	285
8.2.3	Toposes and set theoretical notions	294
8.2.4	Language and theory of a topos	297
8.3	Some models of S.D.G.	302
8.3.1	The algebraic model	302
8.3.2	Varying sets on C^∞ -algebras	304
8.3.3	A good model of S.D.G.	308
8.4	Commented bibliography	310

Bibliography	313
Index	317
