Contents

1 Introduction 1

2 Clifford Algebras and Spin Groups 5
- 2.1 The Clifford Algebras. 5
- 2.2 The groups $Pin(V)$ and $Spin(V)$ 9
- 2.3 Splitting of the Clifford Algebra 13
- 2.4 The complexification of the $Cl(V)$ 16
- 2.5 The Complex Spin Representation 19
- 2.6 The Group $Spin^c(V)$ 20

3 Spin Bundles and the Dirac Operator 23
- 3.1 Spin Bundles and Clifford Bundles 23
- 3.2 Connections and Curvature 28
- 3.3 The Dirac Operator 40
- 3.4 The Case of Complex Manifolds 48

4 The Seiberg-Witten Moduli Space 55
- 4.1 The Equations 55
- 4.2 Space of Configurations 57
- 4.3 Group of Changes of Gauge. 59
- 4.4 The Action 59
- 4.5 The Quotient Space 60
- 4.6 The Elliptic Complex 65

5 Curvature Identities and Bounds 69
- 5.1 Curvature Identities 70
- 5.2 *A Priori* bounds 77
- 5.3 The Compactness of the Moduli Space 80

6 The Seiberg-Witten Invariant **87**
6.1 The Statement 87
6.2 The Parametrized Moduli Space 88
6.3 Reducible Solutions 91
6.4 Compactness of the Perturbed Moduli Space 92
6.5 Variation of the Metric and Self-dual Two-form 94
6.6 Orientability of the Moduli Space 95
6.7 The Case when $b_2^+(X) > 1$ 99
6.8 An Involution in the Theory 100
6.9 The Case when $b_2^+(X) = 1$ 104

7 Invariants of Kähler Surfaces **109**
7.1 The Equations over a Kähler Manifold 109
7.2 Holomorphic Description of the Moduli Space 112
7.3 Evaluation for Kähler Surfaces 118
7.4 Computation for Kähler Surfaces 122
7.5 Final Remarks 126

Bibliography **127**
