

# Table of Contents

Preface .....	VII
<b>1. The Basics.....</b>	<b>1</b>
1.1 Preliminaries and Notation .....	1
1.1.1 Elimination of Quantifiers .....	6
<b>2. Constructing Models with Special Properties .....</b>	<b>11</b>
2.1 Prime and Atomic Models .....	11
2.2 Saturated and Homogeneous Models .....	17
2.3 Countable Models of Complete Theories .....	35
2.4 Indiscernible Sequences.....	40
2.5 Skolem Functions .....	43
<b>3. Uncountably Categorical and <math>\aleph_0</math>-stable Theories .....</b>	<b>49</b>
3.1 Morley's Categoricity Theorem .....	49
3.2 A Universal Domain .....	70
3.3 Totally Transcendental Theories.....	72
3.4 The Baldwin-Lachlan Theorem .....	92
3.5 Introduction to $\omega$ -stable Groups .....	100
3.5.1 A Group Acting on a Strongly Minimal Set .....	114
3.5.2 $\wedge$ -definable Groups and Actions .....	121
<b>4. Fine Structure of Uncountably Categorical Theories .....</b>	<b>125</b>
4.1 $T^{eq}$ .....	126
4.1.1 Totally Transcendental Theories Revisited .....	131
4.1.2 $D^{eq}$ for a Strongly Minimal $D$ .....	136
4.2 The Pregeometries on Strongly Minimal Sets.....	138
4.2.1 Plane Curves .....	143
4.3 Global Geometrical Considerations .....	150
4.3.1 1-based Theories .....	159
4.3.2 1-based Groups .....	164
4.4 Automorphism Groups of Constructions .....	175
4.5 Defining a Group from a Pregeometry.....	192
4.5.1 Germs of Definable Functions .....	194
4.5.2 Getting a Group from an Algebraic Quadrangle .....	204

<b>5. Stability</b>	213
5.1 Stability	213
5.1.1 Ranks and Definability	213
5.1.2 Stability and the Number of Types	228
5.1.3 Morley Sequences and Indiscernibles	230
5.1.4 The Fundamental Order	233
5.2 The Stability Spectrum and $\kappa(T)$	238
5.3 Stable Groups and Modules	242
5.3.1 1-based Groups and Modules	249
5.3.2 Modules	251
5.4 Saturated Models	257
5.4.1 $a$ -models	258
5.5 Prime Models	261
5.5.1 Prime Models in a t.t. Theory	261
5.5.2 $a$ -prime Models	267
5.6 Orthogonality, Domination and Weight	273
5.6.1 Orthogonality	275
5.6.2 Domination	280
5.6.3 Weight	283
5.6.4 Finite Weight	287
<b>6. Superstable Theories</b>	293
6.1 More Ranks	293
6.2 Geometrical Matters: A Dichotomy Theorem	301
6.3 Regular Types	304
6.3.1 Rank Considerations	311
6.4 Strongly Regular Types	314
<b>7. Selected Topics</b>	323
7.1 Bounded and Unbounded Theories	323
7.1.1 Bounded $\omega$ -stable Theories	327
7.1.2 Unbounded Theories	335
7.2 More on Ranks	337
