<b>Notation</b>	vii
<b>Preface</b>	ix
<b>Introduction</b>	1
<b>Chapter 1 Lagrange and Legendre Manifolds, Singularities and Cobordisms</b>	22
§1. Symplectic Manifolds and Lagrange Manifolds	22
§2. Singularities of Smooth Functions	30
§3. Legendre Manifolds	46
§4. Maslov Index	60
§5. Lagrange and Legendre Cobordisms	64
§6. Arnol'd's Construction of the Maslov Index, Borel-Fuchs Classes, and Legendre Cobordism Groups in $J^1(\mathbf{R}^n, \mathbf{R})$	77
<b>Chapter 2 Lagrange and Legendre Characteristic Classes Dual to the Singularities of Caustics and Wave Fronts</b>	88
§7. Stratifications, Semianalytic Sets and Semialgebraic Sets	88
§8. Universal Complexes of Coorientable Classes	93
§9. Generators of the Complexes $\Omega(\Gamma)$ , $\Omega(\Gamma^*)$ , $\omega(\gamma)$ , $\omega(\gamma^*)$	110
§10. Calculation of the Cohomology of Universal Complexes	119
§11. The Complexes $N(G_0)$ , $v(G_0)$ of Non-Cooriented Classes	135
§12. The Complexes $\omega$ , $v$ and Characteristic Classes	143
<b>Chapter 3 Self-Intersections of Wave Fronts and Legendre (Lagrange) Characteristic Numbers</b>	153
§13. Complexes of Multisingularities of Wave Fronts	153
§14. Cohomology of the Complexes $\mathfrak{H}$	158
§15. Reduction of the Lagrange Problem to the Legendre Problem	172
§16. Cycles of Multisingularities and Multiplication in the Homology of the Base of the Legendre Bundle	178

§17. Summary of Results on the Realizability of Characteristic Numbers and Classes	185
<b>Chapter 4</b> Derived Characteristic Classes and Borel-Fuchs Classes	189
§18. Multiplication in Universal Complexes	189
§19. Stiefel-Whitney and Pontryagin Classes of Normal Bundles to Singularity Classes	210
§20. Characteristic Classes of Normal Bundles and Classifying Spaces Connected with Singularity Classes	221
§21. Steenrod Squares of Characteristic Classes	229
§22. Cohomology of Lagrange Grassmannians	238
§23. Thom Polynomials	245
<b>Concluding Remarks and Open Questions</b>	251
<b>Appendix 1:</b> Germs, Jets, and Transversality Theorems	253
<b>Appendix 2:</b> $E_\infty(G_0)$ for the Spectral Sequences of §14	258
<b>References</b>	259
<b>Subject Index</b>	267
