

CONTENTS

PREFACE ix

I

DIFFERENTIAL FORMS

1. The Algebra of Differential Forms 1
2. Exterior Differentiation 5
3. The Fundamental Correspondence 26

II

ORIENTED MANIFOLDS

1. The Notion of a Manifold (with Boundary) 35
2. Orientation 45

III

DIFFERENTIAL FORMS REVISITED

1. 1-Forms 59
2. k -Forms 66
- *3. Push-forwards and Pull-backs 73

IV**INTEGRATION OF DIFFERENTIAL FORMS OVER
ORIENTED MANIFOLDS**

1. The Integral of a 0-Form over a Point (Evaluation) 95
2. The Integral of a 1-Form over a Curve (Line Integrals) 96
3. The Integral of a 2-Form over a Surface (Flux Integrals) 131
4. The Integral of a 3-Form over a Solid Body (Volume Integrals) 160
- *5. Integration via Pull-backs 163

V**THE GENERALIZED STOKES'S THEOREM**

1. Statement of the Theorem 172
2. The Fundamental Theorem of Calculus and Its Analog for Line Integrals 173
3. Green's and Stokes's Theorems 177
4. Gauss's Theorem 190
- *5. Proof of the GST 197

****VI****FOR THE ADVANCED READER**

1. Differential Forms in \mathbb{R}^n and Poincaré's Lemma 212
2. Manifolds, Tangent Vectors, and Orientations 229
3. The Basics of de Rham Cohomology 238

APPENDIX: WHY DOES A MIRROR REVERSE LEFT AND RIGHT? 245

ANSWERS TO EXERCISES 247

INDEX 255
