

Contents

Preface	vii
Chapter 1 Introduction	1
Chapter 2 The Alternating Algebra	7
Chapter 3 de Rham Cohomology	15
Chapter 4 Chain Complexes and their Cohomology	25
Chapter 5 The Mayer–Vietoris Sequence	33
Chapter 6 Homotopy	39
Chapter 7 Applications of de Rham Cohomology	47
Chapter 8 Smooth Manifolds	57
Chapter 9 Differential Forms on Smooth Manifolds	65
Chapter 10 Integration on Manifolds	83
Chapter 11 Degree, Linking Numbers and Index of Vector Fields	97
Chapter 12 The Poincaré–Hopf Theorem	113
Chapter 13 Poincaré Duality	127
Chapter 14 The Complex Projective Space $\mathbb{C}P^n$	139
Chapter 15 Fiber Bundles and Vector Bundles	147
Chapter 16 Operations on Vector Bundles and their Sections	157
Chapter 17 Connections and Curvature	167
Chapter 18 Characteristic Classes of Complex Vector Bundles	181
Chapter 19 The Euler Class	193
Chapter 20 Cohomology of Projective and Grassmannian Bundles	199
Chapter 21 Thom Isomorphism and the General Gauss–Bonnet Formula	211
Appendix A Smooth Partition of Unity	221
Appendix B Invariant Polynomials	227
Appendix C Proof of Lemmas 12.12 and 12.13	233
Appendix D Exercises	243
References	281
Index	283
