Preface	ix
Preface to second edition	xi
Notation	xiii
<b>1 Introduction and historical background</b>	<b>1</b>
1.1 Waring's problem	1
1.2 The Hardy–Littlewood method	3
1.3 Goldbach's problem	6
1.4 Other problems	7
1.5 Exercises	7
<b>2 The simplest upper bound for <math>G(k)</math></b>	<b>8</b>
2.1 The definition of major and minor arcs	8
2.2 Auxiliary lemmas	9
2.3 The treatment of the minor arcs	14
2.4 The major arcs	14
2.5 The singular integral	18
2.6 The singular series	20
2.7 Summary	24
2.8 Exercises	25
<b>3 Goldbach's problems</b>	<b>27</b>
3.1 The ternary Goldbach problem	27
3.2 The binary Goldbach problem	33
3.3 Exercises	36
<b>4 The major arcs in Waring's problem</b>	<b>38</b>
4.1 The generating function	38
4.2 The exponential sum $S(q, a)$	45
4.3 The singular series	48
4.4 The contribution from the major arcs	51

4.5	The congruence condition	53
4.6	Exercises	55
<b>5</b>	<b>Vinogradov's methods</b>	<b>57</b>
5.1	Vinogradov's mean value theorem	57
5.2	The transition from the mean	63
5.3	The minor arcs in Waring's problem	69
5.4	An upper bound for $G(k)$	70
5.5	Wooley's refinement of Vinogradov's mean value theorem	75
5.6	Exercises	92
<b>6</b>	<b>Davenport's methods</b>	<b>94</b>
6.1	Sets of sums of $k$ th powers	94
6.2	$G(4) = 16$	105
6.3	Davenport's bounds for $G(5)$ and $G(6)$	108
6.4	Exercises	109
<b>7</b>	<b>Vinogradov's upper bound for <math>G(k)</math></b>	<b>111</b>
7.1	Some remarks on Vinogradov's mean value theorem	111
7.2	Preliminary estimates	112
7.3	An asymptotic formula for $J_s(X)$	119
7.4	Vinogradov's upper bound for $G(k)$	122
7.5	Exercises	125
<b>8</b>	<b>A ternary additive problem</b>	<b>127</b>
8.1	A general conjecture	127
8.2	Statement of the theorem	128
8.3	Definition of major and minor arcs	128
8.4	The treatment of $n$	130
8.5	The major arcs $\mathfrak{N}(q, a)$	135
8.6	The singular series	136
8.7	Completion of the proof of Theorem 8.1	144
8.8	Exercises	146

<b>9</b>	<b>Homogeneous equations and Birch's theorem</b>	<b>147</b>
	9.1 Introduction	147
	9.2 Additive homogeneous equations	147
	9.3 Birch's theorem	151
	9.4 Exercises	154
<b>10</b>	<b>A theorem of Roth</b>	<b>155</b>
	10.1 Introduction	155
	10.2 Roth's theorem	156
	10.3 A theorem of Furstenburg and Sárközy	161
	10.4 The definition of major and minor arcs	162
	10.5 The contribution from the minor arcs	164
	10.6 The contribution from the major arcs	164
	10.7 Completion of the proof of Theorem 10.2	165
	10.8 Exercises	166
<b>11</b>	<b>Diophantine inequalities</b>	<b>167</b>
	11.1 A theorem of Davenport and Heilbronn	167
	11.2 The definition of major and minor arcs	168
	11.3 The treatment of the minor arcs	169
	11.4 The major arc	172
	11.5 Exercises	174
<b>12</b>	<b>Wooley's upper bound for <math>G(k)</math></b>	<b>175</b>
	12.1 Smooth numbers	175
	12.2 The fundamental lemma	177
	12.3 Successive efficient differences	186
	12.4 A mean value theorem	187
	12.5 Wooley's upper bound for $G(k)$	191
	12.6 Exercises	193
	<b>Bibliography</b>	<b>195</b>
	<b>Index</b>	<b>229</b>
