ACKNOWLEDGEMENTS	ix
INTRODUCTION	xi
Chapter I. ELEMENTS OF COORDINATE-FREE DIFFERENTIAL GEOMETRY	1
1. Elementary introduction to manifolds and fibre bundles	1
1.A. Manifolds	1
1.B. Fibre bundles	3
1.C. Tangent, cotangent and frame bundles	5
1.D. Vector and covector fields on manifolds	7
1.E. Riemannian metrics	9
1.F. Lie groups and Lie algebras	10
2. Connections and related objects	11
2.A. The structure of the tangent bundle	11
2.B. Connection and connector on the tangent bundle	14
2.C. Covariant derivative, parallel translation and geodesics	16
2.D. The case of Riemannian and semi-Riemannian manifolds. Levi-Civita connection.	19
3. General construction of connections	22
3.A. Connections on principal and associated bundles	22
3.B. The case of frame bundles and the tangent bundle	25
3.C. Geodesics, exponential map and normal charts	26
4. Cartan development and integral operators with parallel translation	28
4.A. Cartan development and operator S	28
4.B. Properties of the operator $\Gamma_{t,s}$	31
4.C. Integral operators with parallel translation	32
5. Geometric formalism for classical physics	34
5.A. Newtonian mechanical systems	34
5.B. Mechanical systems with constraints	36
5.C. Mechanical systems on groups	38

5.D. Integral form of Newton's law and the velocity hodograph equation	39
5.E. Elements of Relativity Theory	41
Chapter II. INTRODUCTION TO STOCHASTIC ANALYSIS IN \mathbf{R}^n	45
6. Some preliminary notions from probability theory	45
7. Stochastic integrals, Itô processes and stochastic differential equations	50
7.A. Stochastic integrals with respect to a Wiener process	50
7.B. Itô processes	54
7.C. Stochastic differential equations	56
8. Mean derivatives of stochastic processes and their calculation	60
8.A. General definitions and results	60
8.B. Calculation of mean derivatives for a Wiener process and for solutions of Itô equations	66
8.C. Calculation of mean derivatives for Itô processes	69
Chapter III. STOCHASTIC DIFFERENTIAL EQUATIONS ON MANIFOLDS	75
9. Itô stochastic differential equations on manifolds	75
9.A. Itô bundles and Itô equations	75
9.B. Itô vector fields. Belopolskaya – Dalecky approach	77
9.C. Mean derivatives	82
10. Stochastic integrals with parallel translation and Itô processes on finite-dimensional Riemannian manifolds	86
10.A. General construction	87
10.B. Stochastically complete Riemannian manifolds	92
10.C. Mean Derivatives	95
Chapter IV. LANGEVIN'S EQUATION IN GEOMETRIC FORM	99
11. Langevin's equation on Riemannian manifolds and its weak solutions	99
12. Strong solutions of Langevin's equation and Ornstein – Uhlenbeck processes	103

Table of Contents	vii
Chapter V. NELSON'S STOCHASTIC MECHANICS	107
13. Stochastic Mechanics in \mathbf{R}^n and the basic existence theorem	107
13.A. Principal ideas of Nelson's stochastic mechanics	107
13.B. Basic existence theorem	112
14. Geometrically-invariant form of Stochastic Mechanics and the existence theorem on Riemannian manifolds	117
14.A. Some comments on Stochastic Mechanics on Riemannian manifolds	117
14.B. Existence theorem	120
15. Relativistic Stochastic Mechanics	125
15.A. Stochastic Mechanics in Minkowski space	125
15.B. Stochastic mechanics in the space-times of General Relativity	132
Chapter VI. THE LAGRANGIAN APPROACH TO HYDRODYNAMICS	137
16. Geometry of manifolds of Sobolev diffeomorphisms	137
16.A. Brief account of Sobolev spaces	137
16.B. Manifolds of maps and groups of Sobolev diffeomorphisms	138
16.C. Weak Riemannian metric and related objects	142
16.D. A strong Riemannian metric	145
17. Lagrangian hydrodynamical systems of perfect barotropic and incompressible fluids	146
17.A. The diffuse matter	146
17.B. Perfect barotropic fluid	147
17.C. Perfect incompressible fluid	149
18. Stochastic differential geometry of groups of diffeomorphisms of a flat n -dimensional torus	152
19. Viscous incompressible fluid	157
19.A. Main construction	158
19.B. The case of viscous fluid in a domain in \mathbf{R}^n with a frictionless boundary	162

APPENDIX. Solution of the Newton–Nelson equation with random initial data (<i>Yu.E.Gliklikh and T.J.Zastawniak</i>)	166
