Contents

Preface	xiii
Introduction	xv
Chapter 1. Decomposing Charts	1
§1 Paths	1
§2 Building Charts from Paths	2
§3 Decomposing Charts into Paths	3
§4 Comments	7
Chapter 2. Basic Observations	9
§5 Idempotents, Nilpotents, Inverses, Conjugacy	9
§6 Index and Period of a Chart	11
§7 Cyclic Subsemigroups of C_n	14
§8 Comments	15
Chapter 3. Commuting Charts	19
§9 Examples	19
§10 Characterization of Commuting Charts	20
§11 Comments	24
Chapter 4. Centralizers of Permutations	25
§12 Examples of Centralizers	25
§13 Centralizers as Directs Products	27
§14 Centralizers and Wreath Products	28
§15 Comments	30
Chapter 5. Centralizers of Charts	33
§16 General Case	33
§17 Nilpotent Case: An Example	34
§18 Nilpotent Case: The Wreath Product	35
§19 The Quotient Semigroup	36
§20 Imbedding $C(\eta)$ into the Quotient Semigroup	37
§21 Calculations	40
§22 Orders of Centralizers in C_n	41
§23 Comments	41

Chapter 6. Alternating Semigroups 43
§24 Even Charts 43
§25 Members of A_n^c 44
§26 Generators of Alternating Semigroups 47
§27 Comments 50

Chapter 7. S_n-normal Semigroups 53
§28 Examples, Lemma, Overview, Notation 53
§29 X Semigroups 56
§30 Basic Observations 57
§31 Semilattices and Ideals 58
§32 Nonidempotents in S_n-normal Semigroups 59
§33 Classification for $n \geq 5$ 62
§34 Classification for $n < 5$ 64
§35 Comments 66

Chapter 8. Normal Semigroups and Congruences 69
§36 Examples 69
§37 Congruences on Finite Semilattices 71
§38 Kernels of Congruences 75
§39 Kernels and Normal Semigroups 77
§40 Counting Congruences 80
§41 Comments 81

Chapter 9. Presentations of Symmetric Inverse Semigroups 83
§42 Review: Free Algebras, Presentations, Constructions 83
§43 Technical Lemma 90
§44 Inductive Lemma 94
§45 Comments 96

Chapter 10. Presentations of Alternating Semigroups 97
§46 Defining Relations 97
§47 A_n^c Technical Lemma 98
§48 A_n^c Inductive Lemma 102
§49 Comments 105

Chapter 11. Decomposing Partial Transformations 107
§50 Semigroup Hierarchy 107
§51 Path Notation for Partial Transformations 108
§52 Cilia and Cells of Partial Transformations 111
§53 Idempotents and Nilpotents 112
§54 Multiplication of Partial Transformations 112
§55 Cyclic Semigroups of Partial Transformations 114

§56 Comments 115

Chapter 12. Commuting Partial Transformations 117
§57 Examples 117
§58 Mapping Initial Segments and Cells 118
§59 Orders of Centralizers of Idempotents 123
§60 Howie's Theorem 124
§61 Comments 126

Chapter 13. Centralizers, Conjugacy, Reconstruction 129
§62 Centralizers 129
§63 Conjugacy in C_n 130
§64 Conjugacy in PT_n 133
§65 S_n-normal Semigroups in PT_n 133
§66 Graph Reconstruction 133
§67 Isomorphic Categories of Graphs and Semigroup Extensions 136
§68 Semigroup Reconstruction Conjecture 139
§69 Comments 140

Appendix 141
§70 Objects and Elements 141
§71 Groups and Group Morphisms 142
§72 Permutation Groups 143
§73 Centralizers of Permutations as Direct Products 146
§74 Centralizers of Regular Permutations as Wreath Products 147
§75 Semigroups 148
§76 Semigroup Morphisms and Congruences 150
§77 Green's Relations 151
§78 Free Semigroups, Free Monoids, and Free Groups 152
§79 Categories 152

Bibliography 155
