

Contents

	Preface	xi
1	Exterior algebra	1
1.1	Dual basis	1
1.2	Alternating forms	2
1.3	The wedge product	2
1.4	The inner derivative	4
1.5	Vector space-valued forms	5
1.6	Pull back	6
1.7	Orientation	7
	Problems	7
2	Differential forms on open subsets of \mathbb{R}^n	8
2.1	Tangent vectors	8
2.2	Frames	10
2.3	The tangent mapping	12
2.4	Differential forms	13
2.5	The pullback of differential forms	15
2.6	The exterior derivative	16
2.7	The Poincaré lemma and de Rham cohomology	20
2.8	Integration of n -forms	22
2.9	Integration of p -forms	26
2.10	Stokes' theorem	27
	Problems	31
3	Metric structures	32
3.1	Pseudometric on vector spaces	33
3.2	Induced metric on the dual space	34
3.3	The Hodge star	35
3.4	Isometries	36
3.5	Metric structures on an open subset of \mathbb{R}^n	37
3.6	Holonomic and orthonormal frames	38
3.7	Isometries of open subsets of \mathbb{R}^n	40
3.8	Coderivative	40

3.9	Summarizing chapters 1, 2, 3	42
	Problems	42
4	Gauge theories	43
4.1	Maxwell's equations	43
4.2	Connection = potential	47
4.3	Curvature = field strength	51
4.4	The exterior covariant derivative	54
4.5	Yang–Mills theories	56
4.6	Lattice gauge theory	58
4.7	Summary	59
	Problems	60
5	Einstein–Cartan theory	61
5.1	The equivalence principle	61
5.2	Cartan's structure equations	62
5.3	Metric connections	63
5.4	Action and field equations	65
5.5	A farewell to Γ	68
5.6	Energy–momentum of matter	71
5.7	The Einstein gauge	75
5.8	Geodesics	76
5.9	Geometric interpretation of curvature and torsion	78
	Problems	80
6	The Lie derivative	82
6.1	The flow of a vector field	82
6.2	Lie derivative of forms	84
6.3	The Lie bracket	85
6.4	Derivations of forms	86
6.5	An application in general relativity	87
6.6	Lie derivative of vector fields	89
6.7	Killing vectors	89
	Problems	90
7	Manifolds	92
7.1	Differentiable manifolds	92
7.2	Differentiable mappings	95
7.3	The Cartesian product of manifolds	98
7.4	Submanifolds	98
7.5	Tangent space and vector fields	100
7.6	Frames	103

7.7	The tangent mapping	103
7.8	Differential forms on manifolds	104
7.9	Orientable manifolds	107
7.10	Manifolds with boundary	108
7.11	The partition of unity	111
7.12	Integration	112
7.13	Metric	113
7.14	Gauge theories	114
	Problems	114
8	Lie groups	116
8.1	Definition and examples	116
8.2	Representations of a Lie group	118
8.3	From a Lie group to its Lie algebra	121
8.4	From the representations of a Lie group to representations of its Lie algebra	123
8.5	From a Lie algebra to its Lie groups	126
8.6	The Maurer–Cartan form	129
	Problems	132
9	Fibre bundles	133
9.1	The notion of fibre bundles	133
9.2	The right action of the structure group on a principal bundle	135
9.3	Reduction of the structure group	136
9.4	Bundle maps	137
9.5	Examples	137
9.6	Associated bundles	142
9.7	Sections	142
9.8	Connections on principal bundles	144
9.9	The exterior covariant derivative	147
9.10	Projecting down to the base space	149
9.11	Geometry of the frame bundle	152
9.12	Parallel translation	155
9.13	The holonomy group	157
9.14	Gauge transformations	158
	Problems	163
10	Monopoles, instantons, and related fibre bundles	164
10.1	The Dirac monopole	164

10.2	The 't Hooft–Polyakov monopole	166
10.3	The Yang–Mills instanton	169
10.4	A gravitational instanton	171
10.5	The Dirac monopole as a connection on a nontrivial principal bundle	172
10.6	Recovering the Dirac monopole from the 't Hooft–Polyakov monopole	174
10.7	The instanton bundle	178
10.8	Chern classes	179
	Problems	184
11	Spin	185
11.1	Clifford algebras	185
11.2	Clifford groups	187
11.3	Spinor representations	190
11.4	The Lie algebra of a Clifford group	191
11.5	The Dirac operator on open subsets of \mathbb{R}^n	193
11.6	The Dirac action	196
11.7	Spin structures	197
11.8	Kähler fermions	199
	Problems	200
12	An algebraic approach to anomalies	201
12.1	Polynomials and Ward operators	201
12.2	The Wess–Zumino consistency condition	203
12.3	Stora's solutions	204
12.4	Gravitational anomalies	208
12.5	Lie algebra cohomology	209
	Problems	211
13	Anomalies from graphs	212
13.1	From the triangle to its trilinear form	212
13.2	Yang–Mills anomalies in even-dimensional spacetimes	216
13.3	Gravitational anomalies	216
	Problems	220
	References	221
	Bibliography	223
	Notation	224
	Index	227
