NOTATION	xi
INTRODUCTION	1
CHAPTER ONE: FROM FERMAT TO GAUSS	
§1. FERMAT, EULER AND QUADRATIC RECIPROCITY	7
A. Fermat	8
B. Euler	9
C. $p = x^2 + ny^2$ and Quadratic Reciprocity	12
D. Beyond Quadratic Reciprocity	19
E. Exercises	20
§2. LAGRANGE, LEGENDRE AND QUADRATIC FORMS	23
A. Quadratic Forms	24
B. $p = x^2 + ny^2$ and Quadratic Forms	30
C. Elementary Genus Theory	32
D. Lagrange and Legendre	37
E. Exercises	43

§3.	GAUSS, COMPOSITION AND GENERA	47
	A. Composition and the Class Group	47
	B. Genus Theory	53
	C. $p = x^2 + ny^2$ and Euler's Convenient Numbers	59
	D. <i>Disquisitiones Arithmeticae</i>	63
	E. Exercises	66
§4.	CUBIC AND BIQUADRATIC RECIPROCITY	74
	A. $\mathbb{Z}[\omega]$ and Cubic Reciprocity	75
	B. $\mathbb{Z}[i]$ and Biquadratic Reciprocity	81
	C. Gauss and Higher Reciprocity	83
	D. Exercises	89
CHAPTER TWO: CLASS FIELD THEORY		
§5.	THE HILBERT CLASS FIELD AND $p = x^2 + ny^2$	97
	A. Number Fields	98
	B. Quadratic Fields	103
	C. The Hilbert Class Field	105
	D. Solution of $p = x^2 + ny^2$ for infinitely many n	110
	E. Exercises	115
§6.	THE HILBERT CLASS FIELD AND GENUS THEORY	120
	A. Genus Theory for Field Discriminants	121
	B. Applications to the Hilbert Class Field	127
	C. Exercises	128
§7.	ORDERS IN IMAGINARY QUADRATIC FIELDS	132
	A. Orders in Quadratic Fields	133
	B. Orders and Quadratic Forms	137
	C. Ideals Prime to the Conductor	143
	D. The Class Number	146
	E. Exercises	150
§8.	CLASS FIELD THEORY AND THE ČEBOTAREV DENSITY THEOREM	159
	A. The Theorems of Class Field Theory	159
	B. The Čebotarev Density Theorem	168

C.	Norms and Ideles	172
D.	Exercises	174
§9.	RING CLASS FIELDS AND $p = x^2 + ny^2$	179
A.	Solution of $p = x^2 + ny^2$ for all n	179
B.	The Ring Class Fields of $\mathbb{Z}[\sqrt{-27}]$ and $\mathbb{Z}[\sqrt{-64}]$	183
C.	Primes Represented by Positive Definite Quadratic Forms	188
D.	Ring Class Fields and Generalized Dihedral Extensions	190
E.	Exercises	192
 CHAPTER THREE: COMPLEX MULTIPLICATION		
§10.	ELLIPTIC FUNCTIONS AND COMPLEX MULTIPLICATION	199
A.	Elliptic Functions and the Weierstrass \wp -Function	200
B.	The j -Invariant of a Lattice	205
C.	Complex Multiplication	208
D.	Exercises	216
§11.	MODULAR FUNCTIONS AND RING CLASS FIELDS	219
A.	The j -Function	220
B.	Modular Functions for $\Gamma_0(m)$	225
C.	The Modular Equation $\Phi_m(X, Y)$	231
D.	Complex Multiplication and Ring Class Fields	236
E.	Exercises	242
§12.	MODULAR FUNCTIONS AND SINGULAR j-INVARIANTS	248
A.	The Cube Root of the j -Function	249
B.	The Weber Functions	256
C.	j -Invariants of Orders of Class Number 1	260
D.	Weber's Computation of $j(\sqrt{-14})$	263
E.	Imaginary Quadratic Fields of Class Number 1	271
F.	Exercises	274
§13.	THE CLASS EQUATION	285
A.	Computing the Class Equation	286
B.	Computing the Modular Equation	293
C.	Theorems of Deuring, Gross and Zagier	298
D.	Exercises	303

§14. ELLIPTIC CURVES	308
A. Elliptic Curves and Weierstrass Equations	308
B. Complex Multiplication and Elliptic Curves	312
C. Elliptic Curves over Finite Fields	315
D. Elliptic Curve Primality Tests	323
E. Exercises	330
