Preface 1

Introduction 3

1 Voronoi diagrams in nice metrics 9

1.1 The Euclidean Voronoi diagram . . . 9
1.2 Nice metrics . . . 16

2 Abstract Voronoi diagrams 31

2.1 Definitions . . . 32
2.2 Elementary properties . . . 34
2.3 The neighborhoods of points in V(S) . . . 36
2.4 Augmented curve systems . . . 43
2.5 The shape of the Voronoi regions . . . 46
2.6 The graph structure of abstract Voronoi diagrams . . . 51
2.7 Characterizing Voronoi diagrams . . . 52

3 Computing abstract Voronoi diagrams 63

3.1 Representing the Voronoi diagram . . . 64
3.2 The divide-and-conquer approach . . . 67
3.3 Bisecting chains . . . 73
3.4 The non-degenerate case . . . 77
3.4.1 Determining endpoints of chain segments . . . 77
3.4.2 Finding the continuing segment . . . 92
3.4.3 The complete algorithm . . . 97
3.5 The degenerate case . . . 99
3.5.1 Local separation of curves . . . 101
3.5.2 Cross-points . . . 109
3.5.3 The modified algorithm . . . 112

4 Acyclic partitions 131
4.1 Supported d-circles 131
4.2 Simply-connected d-circles 140
4.3 The Moscow metric 147

Concluding Remarks 159
