

CONTENTS

Preface	v
Chapter I. The Classical Theory	1
I.1. Riemann Integration	1
I.2. Riemann-Stieltjes Integration	8
Chapter II. Lebesgue's Measure	20
II.0. The Idea	20
II.1. Existence	22
II.2. Euclidean Invariance	31
Chapter III. Lebesgue Integration	36
III.1. Measure Spaces	36
III.2. Construction of Integrals	43
III.3. Convergence of Integrals	54
III.4. Products of Measures	66
Chapter IV. Changes of Variable	73
IV.0. Introduction	73
IV.1. Lebesgue Integrals vs. Riemann Integrals	73
IV.2. Polar Coordinates	78
IV.3. Jacobi's Transformation and Surface Measure	82
IV.4. The Divergence Theorem	93
Chapter V. Some Basic Inequalities	103
V.1. Jensen, Minkowski, and Hölder	103
V.2. The Lebesgue Spaces	108
V.3. Convolution and Approximate Identities	119
Chapter VI. A Little Abstract Theory	128
VI.1. An Existence Theorem	128
VI.2. Hilbert Space and the Radon-Nikodym Theorem	138
Index	145
