

Contents

Preface	ix
Chapter 1. CR Structures	1
1. Some observations of Poincaré	1
2. CR manifolds	3
3. CR functions	17
4. CR maps and the realization problem	19
5. CR structures by means of differential forms	24
6. Reinhardt hypersurfaces	30
Chapter 2. Some Automorphism Groups	35
1. Automorphism groups and the absence of a Riemann Mapping Theorem	35
2. The group $SU(2, 1)$	42
Chapter 3. Formal Theory of the Normal Form	57
Chapter 4. Geometric Theory of the Normal Form	67
Chapter 5. Background for Cartan's Work	89
1. A simple equivalence problem	89
2. Maurer-Cartan connections	93
3. Projective structures	106
Chapter 6. Cartan's Construction	117
1. The basic construction	117
2. Two variations	129
Chapter 7. Geometric Consequences	147
Chapter 8. Chains	157
1. The chains of Cartan and Moser	157
2. Example: A family of Reinhardt hypersurfaces	171
3. Chain-preserving maps	179
4. Other results	182

Chapter 9. Chains and Circles in Complex Projective Geometry	189
1. Circles and anti-involutions	189
2. The equations for pseudocircles	199
Chapter 10. Nonsolvability of the Lewy Operator	209
1. The basic results	209
2. An improvement	218
Notes	227
References	233
Index	237
