

# Table of Contents

Chapter I. Hermitian Forms over Rings . . . . .	1
§1. Rings with Involution. . . . .	1
§2. Sesquilinear and Hermitian Forms . . . . .	5
§3. Hermitian Modules . . . . .	11
§4. Symplectic Spaces . . . . .	21
§5. Unitary Rings and Modules . . . . .	22
§6. Hermitian Spaces over Division Rings . . . . .	28
§7. Change of Rings . . . . .	36
§8. Products of Hermitian Forms . . . . .	47
§9. Morita Theory for Hermitian Modules . . . . .	51
§10. Witt Groups . . . . .	59
§11. Cartesian Diagrams and Patching of Hermitian Forms . . . . .	64
Chapter II. Forms in Categories. . . . .	72
§1. Additive Categories . . . . .	72
§2. Categories with Duality . . . . .	75
§3. Transfer . . . . .	81
§4. Reduction. . . . .	85
§5. The Theorem of Krull-Schmidt for Additive Categories. . . . .	93
§6. The Krull-Schmidt Theorem for Hermitian Spaces. . . . .	96
§7. Some Applications. . . . .	101
Chapter III. Descent Theory and Cohomology . . . . .	106
§1. Descent of Elements. . . . .	106
§2. Descent of Modules and Algebras . . . . .	108
§3. Discriminant Modules . . . . .	124
§4. Quadratic Algebras . . . . .	127
§5. Azumaya Algebras. . . . .	134
§6. Graded Algebras and Modules . . . . .	149
§7. Universal Norms . . . . .	161
§8. Involutions on Azumaya Algebras . . . . .	169
§9. The Pfaffian . . . . .	177

Chapter IV. The Clifford Algebra . . . . .	193
§1. Construction of the Clifford Algebra . . . . .	193
§2. Structure of the Clifford Algebra, the Even Rank Case . . . . .	199
§3. Structure of the Clifford Algebra, the Odd Rank Case . . . . .	207
§4. The Discriminant and the Arf Invariant . . . . .	211
§5. The Special Orthogonal Group . . . . .	223
§6. The Spinors. . . . .	227
§7. Canonical Isomorphisms . . . . .	236
§8. Invariants of Quadratic Spaces . . . . .	242
§9. Quadratic Spaces with Trivial Arf Invariant . . . . .	247
Chapter V. Forms of Low Rank. . . . .	251
§1. Quadratic Modules of Rank 1. . . . .	251
§2. Quadratic Modules of Rank 2. . . . .	252
§3. Quadratic Modules of Rank 3. . . . .	260
§4. Quadratic Modules of Rank 4. . . . .	264
§5. Quadratic Spaces of Rank 5 and 6 . . . . .	275
§6. Hermitian Modules of Low Rank. . . . .	300
§7. Composition of Quadratic Spaces. . . . .	305
Chapter VI. Splitting and Cancellation Theorems . . . . .	312
§1. Semilocal Rings, the Stable Range . . . . .	312
§2. The $f$ -Rank . . . . .	322
§3. Serre's Splitting Theorem and Cancellation . . . . .	327
§4. Unitary Groups . . . . .	335
§5. Cancellation for Unitary Spaces over Semilocal Rings . . . . .	360
§6. Cancellation and Stability for Unitary Spaces . . . . .	371
§7. A Splitting Theorem . . . . .	379
Chapter VII. Polynomial Rings . . . . .	390
§1. Principal Ideal Domains . . . . .	390
§2. Polynomial Rings . . . . .	400
§3. Bundles over $\mathbb{P}_D^1$ . . . . .	406
§4. The Theorem of Karoubi. . . . .	409
§5. Quillen's Theorem. . . . .	414
§6. A Rigidity Theorem and the Horrocks Theorem . . . . .	419
§7. Isotropic Hermitian Spaces . . . . .	425
§8. Projective Modules over Polynomial Rings . . . . .	429
§9. Hermitian Spaces of Low Rank . . . . .	440
§10. Indecomposable Anisotropic Spaces . . . . .	448
§11. Hermitian Modules over Projective Spaces . . . . .	453

<b>Chapter VIII. Witt Groups of Affine Rings</b> . . . . .	<b>468</b>
§1. Witt Group of Schemes. . . . .	468
§2. Domains of Dimension $\leq 3$ . . . . .	472
§3. Regular Local Rings Essentially of Finite Type. . . . .	481
§4. Real Smooth Surfaces. . . . .	490
§5. Real Curves. . . . .	493
§6. Examples . . . . .	495
§7. Symplectic Bundles over Affine Surfaces. . . . .	499
<b>Bibliography.</b> . . . . .	<b>502</b>
<b>Index.</b> . . . . .	<b>520</b>
