CONTENTS

PART ONE: TOPOLOGY 1

Chapter 1 Preliminaries 3

1 The Topological Viewpoint 3
2 Set Theory 8
3 The Real Line 16
4 Functions 21
5 Relations 28
Exercises, Sections 1-5 36

Chapter 2 Metric Topology 42

1 Topology of the Euclidean Line 42
2 Topology of Euclidean Space 49
3 Metric Topology 54
4 Continuous Functions 63
5 Completeness 68
Exercises, Sections 1-5 75

Chapter 3 Metric Space Properties 85

1 Connected Spaces 85
2 Sequentially Compact Metric Spaces 89
3 Hyperspace of Compact Subspaces 96
4 Topological Equivalence 101
5 Peano's Curve 105
Exercises, Sections 1-5 109

Chapter 4 Topological Spaces 116

1 Topologies 116
2 Topological Separation 122
3 Interior, Closure, and Boundary 127
4 Continuous Functions 131
Exercises, Sections 1-4 136

Chapter 5 Construction of Spaces 143
1 Subspaces and Identification Spaces 143
2 Topological Bases 151
3 Topological Unions and Products 156
4 Weak Topologies and Adjunction Spaces 163
Exercises, Sections 1-4 168

Chapter 6 Connectedness 175
1 Connected Spaces 175
2 Components 180
3 Path-Connectedness 186
Exercises, Sections 1-3 192

Chapter 7 Compactness 197
1 Compact Spaces 197
2 Topological Aspects of Compactness 201
3 Compactness in Metric Spaces 207
4 Locally Compact Spaces 211
5 A Characterization of Arcs 218
Exercises, Sections 1-5 226

Chapter 8 Separation and Covering Properties 233
1 Normal Spaces 233
2 Completely Regular Spaces 241
3 Metrization Theorems 247
4 Paracompact Spaces 254
Exercises, Sections 1-5 259

PART TWO: HOMOTOPY 263

Chapter 9 Fundamental Group 265
1 The Fundamental Groupoid 265
2 Path-Homotopy in Spheres 272
3 The Fundamental Group 280
4 Poincaré Index Formula 285
Exercises, Sections 1-4 292

Chapter 10 Homotopy 296
1 Categories and Functors 296
2 Basic Homotopy Concepts 301
3 Homotopy Category 305
4 Fibrations and Cofibrations 312
5 Homotopy Equivalences 317
Exercises, Sections 1-5 323

Chapter 11 Group Theory **328**
1 Overview 328
2 Groups and Homomorphisms 331
3 Products and Sums of Groups 335
4 Quotient Groups 340
Exercises, Sections 2-4 347

Chapter 12 Calculations of π_1 **350**
1 The Seifert-Van Kampen Theorem 350
2 Polygonal Complexes 357
3 Knot Theory 364
Exercises, Sections 1-3 372

Chapter 13 Surfaces **374**
1 Polygonal Surfaces 374
2 Classification of Surfaces 379
3 Euler Characteristic 385
4 Poincaré's Index Theorem 390
Exercises, Sections 1-4 394

Chapter 14 Covering Spaces **399**
1 Fundamentals 399
2 Liftings of Paths and Homotopies 403
3 General Liftings 409
4 Fundamental Theorem 413
5 Intermediate Covering Spaces 418
6 Group Actions and Geometries 425
Exercises, Sections 1-6 430

Chapter 15 CW Complexes **435**
1 Cell Complexes 435
2 Fundamental Group of a CW Complex 444
3 Covering Spaces of CW Complexes 454
Exercises, Sections 1-3 462

Bibliography **466**

Index **468**
