Preface

0. Poisson algebras	1
1. Symmetric Schouten products	7
§1. Symmetric Schouten products of multilinear maps	8
§2. Symmetric Schouten products of multiderivations	21
§3. Symmetric Schouten products of contravariant tensors	28
§4. The Poisson algebra of a Lie group	32
§5. Poisson filtered algebras	35
§6. Differential operators on algebras	37
§7. Differential operators on manifolds	39
§8. Symbols of differential operators	41
2. Alternating Schouten products	44
§1. Alternating Schouten products of multilinear maps	44
§2. Cohomology of Lie algebras	51
§3. Alternating Schouten products of multiderivations	53
§4. Cohomology of Poisson algebras	58
§5. Alternating Schouten products of contravariant tensors	63
§6. The Lie-Poisson structure	67
§7. The approach of Tulczjew and Lichnerowicz	68
3. Poisson manifolds	71
§1. Poisson manifolds	72
§2. Poisson manifolds of constant rank	77
§3. The structure of Poisson manifolds	83
§4. Local characterization	88
§5. Dirac brackets	90
§6. Dirac theory of constraints	92
§7. Poisson reduction	98

4. Calculus on Poisson manifolds	103
1. The Lie bracket of 1-forms on a Poisson manifold	103
2. Calculus on Poisson manifolds	107
3. Poisson morphisms	114
References	121
Index	127
