Introduction	1
PART I	
WHY HAVE HIERARCHY?	
1 Market failures and hierarchical solutions: the tension between individual and social rationality	15
2 Bargaining failure: coordination, bargaining, and contracts	19
3 Voting failure: social choice in a dictatorial hierarchy	36
	58
PART II	
MANAGERIAL DILEMMAS	
4 Horizontal dilemmas: social choice in a decentralized hierarchy	75
5 Vertical dilemmas: piece-rate incentives and credible commitments	77
6 Hidden action in hierarchies: principals, agents, and teams	102
7 Hidden information in hierarchies: the logical limits of mechanism design	120
8 Hierarchical failures and market solutions: can competition create efficient incentives for hierarchy?	138
	159

Contents

	PART III	
	COOPERATION AND LEADERSHIP	179
9	The possibilities of cooperation: repeated vertical dilemmas	182
10	The indeterminacy of cooperation: conventions, culture, and commitment	199
11	The political economy of hierarchy: commitment, leadership, and property rights	216
	Epilogue: politics, rationality, and efficiency	235
	<i>References</i>	239

	<i>Subject Index</i>	250

Tables and figures

TABLES

1.1	Individual self-interest as an aid to social efficiency (plan A)	page 22
1.2	Individual self-interest as an obstacle to social efficiency (plan B)	23
1.3	Consumption externalities inducing a prisoners' dilemma	30
1.4	Production externalities inducing a prisoners' dilemma	32
2.1	Outcomes under different property right allocations and alternative benefit-cost parameters	42
2.2	The Battle of the Sexes game	44
3.1	Majority rule and Borda count rankings of three alternatives	62
4.1	Decentralized choice at Apex, Inc.	87
7.1	Misrepresentation in voting: a typical example	140
9.1	One-period team Prisoners' Dilemma game	184
9.2	Generalized payoffs in a repeated team Prisoners' Dilemma game	185
9.3	Shirking as a dominant strategy when w is small	186
9.4	Multiplicity of Nash equilibria when w is large	187

FIGURES

5.1	The Stackelberg equilibrium in a piece-rate game	108
5.2	Redistribution of gains in employees' favor caused by misrepresentation of the employee reaction function	110
5.3	The piece-rate game as a commitment problem	114

Tables and figures

6.1	The inefficient Nash equilibrium in the principal-agent problem	124
7.1	Incentive-compatible scheme 1	146
7.2	Incentive-compatible scheme 2	151
10.1	The trust/honor game	200
