

Contents

0. Introduction	1
I. Fourier-Bros-Iagolnitzer transformation and first microlocalization	7
1. FBI transformation with quadratic phase	7
2. Fourier-Bros-Iagolnitzer transformations	14
3. Quantized canonical transformations	17
4. Change of FBI	23
II. Second microlocalization	28
1. Second microlocalization along $T_{\{0\}}^* \mathbb{R}^n$	28
2. Second microlocalization along a lagrangian submanifold	31
3. Trace theorems	41
III. Geometric upper bounds	47
1. Subanalytic sets and subanalytic maps	47
2. Critical points and critical values	52
3. Upper bounds for microsupports and second microsupports	58
IV. Semilinear Cauchy problem	72
1. Statement of the result and method of proof	72
2. Sobolev spaces and integrations by part	77
3. End of the proof of Theorem 1.3	84
4. The swallow-tail's theorem and various extensions	95
Bibliography	99
