

# CONTENTS

Preface	vi
Notation	viii
1. Abstract Semigroups	1
2. Algebraic Geometry	12
3. Linear Algebraic Semigroups	18
4. Linear Algebraic Groups	27
5. Connected Algebraic Semigroups	42
6. Connected Algebraic Monoids	48
7. Reductive Groups and Regular Semigroups	69
8. Diagonal Monoids	80
9. Cross-section Lattices	89
10. $\mathcal{G}$ -Structure	97
11. Renner's Decomposition and Related Finite Semigroups	109
12. Biordered Sets	121
13. Tits Building	129
14. The System of Idempotents	135
15. $\mathcal{G}$ -irreducible and $\mathcal{G}$ -co-reducible Monoids	146
16. Renner's Extension Principle and Classification	156
References	163
Index	170
