Preface		
Chapter 1	Introduction	1
§1.1	The cohomology of complex projective varieties	1
§1.2	De Rham cohomology and L^2-cohomology	6
§1.3	Morse theory for singular spaces	9
Chapter 2	Review of homology, cohomology and sheaf theory	13
§2.1	Simplicial homology	13
§2.2	Singular homology	17
§2.3	Homology with closed support	20
§2.4	Sheaves	21
§2.5	Čech cohomology of sheaves	26
§2.6	Cohomology of sheaves via derived functors	29
§2.7	Conclusion	34
Chapter 3	The definition of intersection homology	37
§3.1	Quasi-projective complex varieties	37
§3.2	Stratifications	39
§3.3	Topological pseudomanifolds	42
§3.4	Intersection chains and perversities	44
§3.5	Simple examples of intersection homology	48
§3.6	Normalisations	50
§3.7	Relative intersection homology	52
§3.8	Intersection homology is not a homotopy invariant	53
§3.9	Intersection homology with local coefficients	56
§3.10	Generalised Poincaré duality	58
Chapter 4	L^2-cohomology and intersection cohomology	62
§4.1	Isolated conical singularities	62
§4.2	The L^2-cohomology of a punctured cone	64
§4.3	The natural map $H^*_{(2)}(X) \to IH^*(X)$	70

Chapter 5	The intersection sheaf complex $\underline{\underline{IC}}^{\cdot}_X$	75
§5.1	Definition of the sheaf complexes $\underline{\underline{C}}^{\cdot}_X$ and $\underline{\underline{IC}}^{\cdot}_X$	75
§5.2	The cohomology of the sheaves $\underline{\underline{C}}^{j}_X$ and $\underline{\underline{IC}}^{j}_X$	78
§5.3	Spectral sequences and hypercohomology	82
§5.4	Towards the topological invariance of intersection homology	87
§5.5	Deligne's construction of the intersection sheaf complex	91
Chapter 6	Characteristic p and the Weil conjectures	95
§6.1	Statement of the Weil conjectures	95
§6.2	Basic properties of ℓ-adic cohomology	98
§6.3	Étale topology and cohomology	101
§6.4	The Weil conjectures for singular varieties and ℓ-adic intersection cohomology	105
§6.5	The decomposition theorem	108
Chapter 7	$\mathcal{D}$-modules and the Riemann-Hilbert correspondence	114
§7.1	The Riemann-Hilbert problem	114
§7.2	Differential systems over $\mathbb{C}^n$	117
§7.3	$\mathcal{D}_X$-modules and intersection homology	120
§7.4	The characteristic variety of a $\mathcal{D}_X$-module	123
§7.5	Holonomic differential systems	126
§7.6	Examples of characteristic varieties	128
§7.7	Left and right $\mathcal{D}_X$-modules	132
§7.8	Restriction of $\mathcal{D}_X$-modules	133
§7.9	Regular singularities	137
§7.10	The Riemann-Hilbert correspondence	140
Chapter 8	The Kazhdan-Lusztig conjecture	145
§8.1	Verma modules	145
§8.2	$\mathcal{D}$-modules over flag manifolds	150
§8.3	Characteristic p	154
§8.4	Hecke algebras and the Kazhdan-Lusztig polynomials	156
