

## CONTENTS

<b>Preface</b>	<b>vii</b>
<b>Chapter I. The separable case in historical perspective</b>	<b>1</b>
I.1. A compactification problem	1
I.2. Dimensionsgrad	2
I.3. The small inductive dimension $\text{ind}$	3
I.4. The large inductive dimension $\text{Ind}$	9
I.5. The compactness degree; de Groot's problem	14
I.6. Splitting the compactification problem	20
I.7. The completeness degree	28
I.8. The covering dimension $\text{dim}$	41
I.9. The covering completeness degree	48
I.10. The $\sigma$ -compactness degree	53
I.11. Pol's example	59
I.12. Kimura's theorem	66
I.13. Guide to dimension theory	68
I.14. Historical comments and unsolved problems	69
<b>Chapter II. Mappings into spheres</b>	<b>73</b>
II.1. Classes and universe	74
II.2. Inductive dimension modulo a class $\mathcal{P}$	76
II.3. Kernels and surplus	85
II.4. $\mathcal{P}$ -Ind and mappings into spheres	87
II.5. Covering dimensions modulo a class $\mathcal{P}$	93
II.6. $\mathcal{P}$ -dim and mappings into spheres	100
II.7. Comparison of $\mathcal{P}$ -Ind and $\mathcal{P}$ -dim	106
II.8. Hulls and deficiency	109
II.9. Absolute Borel classes in metric spaces	112
II.10. Dimension modulo Borel classes	119

II.11. Historical comments and unsolved problems	126
<b>Chapter III. Functions of inductive dimensional type</b>	<b>129</b>
III.1. Additivity	130
III.2. Normal families	139
III.3. Optimal universe	146
III.4. Embedding theorems	160
III.5. Axioms for the dimension function	171
III.6. Historical comments and unsolved problems	181
<b>Chapter IV. Functions of covering dimensional type</b>	<b>185</b>
IV.1. Finite unions	186
IV.2. Normal families	192
IV.3. The Dowker universe $\mathcal{D}$	197
IV.4. Dimension and mappings	204
IV.5. Historical comments and unsolved problems	215
<b>Chapter V. Functions of basic dimensional type</b>	<b>217</b>
V.1. The basic inductive dimension	217
V.2. Excision and extension	223
V.3. The order dimension	234
V.4. The mixed inductive dimension	241
V.5. Historical comments and unsolved problems	244
<b>Chapter VI. Compactifications</b>	<b>247</b>
VI.1. Wallman compactifications	248
VI.2. Dimension preserving compactifications	258
VI.3. The Freudenthal compactification	266
VI.4. The inequality $\mathcal{K}\text{-Ind} \geq \mathcal{K}\text{-Def}$	282
VI.5. Kimura's characterization of $\mathcal{K}\text{-def}$	287
VI.6. The inequality $\mathcal{K}\text{-dim} \geq \mathcal{K}\text{-def}$	300
VI.7. Historical comments and unsolved problems	312
<b>Chart 1. The absolute Borel classes</b>	<b>72</b>
<b>Chart 2. Compactness dimension functions</b>	<b>246</b>
<b>Bibliography</b>	<b>315</b>
<b>List of symbols</b>	<b>327</b>
<b>Index</b>	<b>329</b>
