# Contents of Volume 3

**Some Remarks on Primality Testing Based on Lucas Functions** 1
*Siguna Müller*

**Splitting of Primes in Infinite Extensions** 23
*V. Kumar Murty*

**The ABC Conjecture and Prime Divisors of the Lucas and Lehmer Sequences** 43
*Ram Murty and Siman Wong*

**On the Parity of Generalized Partition Functions** 55
*J.-L. Nicolas and A. Sárközy*

**Quadratic Twists of Modular Forms and Elliptic Curves** 73
*Ken Ono and Matthew A. Papanikolas*

**Identities from the Holomorphic Projection of Modular Forms** 87
*Cormac O'Sullivan*

**Iterative Methods for Pairs of Additive Diophantine Equations** 107
*Scott T. Parsell*

**Quelques Remarques sur la Théorie d'Iwasawa des Courbes Elliptiques** 119
*Bernadette Perrin-Riou*

**Computing Rational Points on Curves** 149
*Bjorn Poonen*

**Norms of Products and Factors of Polynomials** 173
*Igor E. Pritsker*

**G. H. Hardy As I Knew Him** 191
*Robert A. Rankin*

**Discriminants of Some Painlevé Polynomials** 205
*David P. Roberts*

**Identities Between Mahler Measures** 223
*Fernando Rodriguez-Villegas*

**Normal Integral Bases, Swan Modules and p-Adic L-Functions** 231
*Anupam Srivastav*

**Discriminants and Divisibility for Chebyshev-Like Polynomials** 243
*Kenneth B. Stolarsky*

**Remarks on Adelic Geometry of Numbers** 253
*Jeffrey Lin Thunder*

**Some Applications of Diophantine Approximation** 261
*R. Tijdeman*

**On the Solutions of a Family of Sextic Thue Equations** 285
*Alain Togbé*

**Waring's Problem: A Survey** 301
*R. C. Vaughan and T. D. Wooley*

**Chernoff Type Bounds for Sums of Dependent Random Variables and Applications in Additive Number Theory** 341
*V. H. Vu*

**Prime Divisors of the Bernoulli and Euler Numbers** 357
*Samuel S. Wagstaff, Jr.*

**An Improved Method for Solving the Family of Thue Equations $X^4 - 2rX^2Y^2 - sY^4 = 1$** 375
*P. G. Walsh*

**Constructing Hyperelliptic Curves Using Complex Multiplication** 385
*Annegret Weng*

**Solving the Pell Equation** 397
*H. C. Williams*

**A Central Limit Theorem for the Number of Distinct Degrees of Prime Factors in Additive Arithmetical Semigroups** 437
*Wen-Bin Zhang*
