

Contents

Introduction and Dedication	vii
I. The Idea of Analytic Number Theory	1
Addition Problems	1
Change Making	2
Crazy Dice	5
Can $r(n)$ be “constant?”	8
A Splitting Problem	8
An Identity of Euler’s	11
Marks on a Ruler	12
Dissection into Arithmetic Progressions	14
II. The Partition Function	17
The Generating Function	18
The Approximation	19
Riemann Sums	20
The Coefficients of $q(n)$	25
III. The Erdős–Fuchs Theorem	31
Erdős–Fuchs Theorem	35
IV. Sequences without Arithmetic Progressions	41
The Basic Approximation Lemma	42

vi Contents

V. The Waring Problem	49
VI. A “Natural” Proof of the Nonvanishing of L-Series	59
VII. Simple Analytic Proof of the Prime Number Theorem	65
First Proof of the Prime Number Theorem.	68
Second Proof of the Prime Number Theorem.	70
Index	75
