

Table of Contents

Preface.....	v
<i>Gilles Halbout</i>	
Deformation quantization, methods and applications	1
<i>Giuseppe Dito and Daniel Sternheimer</i>	
Deformation quantization: genesis, developments and metamorphoses	9
<i>Giuseppe Dito</i>	
Deformation quantization of covariant fields	55
<i>Boris Fedosov</i>	
On the trace density in deformation quantization	67
<i>Daniel Arnaudon, Jean Avan, Luc Frappat, and Eric Ragoucy</i>	
Deformed double Yangians and quasi-Hopf algebras	85
<i>Stefan Waldmann</i>	
On the representation theory of deformation quantization	107
<i>Claude Roger</i>	
Unimodular vector fields and deformation quantization	135
<i>Christian Frønsdal</i>	
Harrison cohomology and abelian deformation quantization on algebraic varieties	149
<i>Louis Boutet de Monvel</i>	
Related semi-classical and Toeplitz algebras	163

Alberto S. Cattaneo, Giovanni Felder, and Lorenzo Tomassini

Fedosov connections on jet bundles and deformation quantization 191

Dimitri Tamarkin

Quantization of Lie bialgebras via the formality of the operad of little disks 203
