Preface	ix
Preface to the English Edition	xi
Introduction	xiii
Chapter 1. Basic Properties of D -modules	1
1.1. D -modules	1
1.2. Differential Homomorphisms of \mathcal{O}_X -modules	2
1.3. A System of Generators of D	6
1.4. Left \mathcal{D}_X -modules and Right \mathcal{D}_X -modules	7
Chapter 2. Characteristic Varieties	11
2.1. Cotangent Bundles	11
2.2. Characteristic Varieties	15
2.3. Involutivity	21
2.4. Codimension Filtration	22
Chapter 3. Construction of D -modules	29
3.1. Tensor Products	29
3.2. Homological Properties of D -modules	32
3.3. Dual Module	36
3.4. Algebraic Relative Cohomology	39
Chapter 4. Functorial Properties of D -modules	57
4.1. Pull-backs of D -modules	57
4.2. Derived Functors of Inverse Images	59
4.3. External Tensor Product	60
4.4. Coherence of Inverse Images	61
4.5. Cauchy–Kovalevskaya Theorem	68
4.6. Integrals of D -modules	74
4.7. Coherence of Integrals	76

4.8.	D -modules Supported by a Submanifold	84
4.9.	Adjunction Formula	87
4.10.	Adjunction Formula (Inverse Form)	93
4.11.	Holonomic Systems	94
Chapter 5.	Regular Holonomic Systems	99
5.1.	Ordinary Differential Equations with Regular Singularities	99
5.2.	Holonomic Modules with Regular Singularities	100
5.3.	Riemann–Hilbert Correspondence	102
Chapter 6.	b -functions	105
6.1.	Motivation for b -functions	105
6.2.	\mathcal{D} -module Generated by $f(x)^s$	106
6.3.	Rationality of b -functions	109
6.4.	b -functions in the Case of Quasi-homogeneous Isolated Singularities	114
6.5.	b -function and Irreducibility	117
Chapter 7.	Ring of Formal Microdifferential Operators	123
7.1.	Microlocalization	123
7.2.	Formal Microdifferential Operators on Manifolds	125
7.3.	Microdifferential Operators	129
7.4.	Algebraic Properties of $\widehat{\mathcal{E}}$	130
7.5.	Relations between \mathcal{D}_X and $\widehat{\mathcal{E}}_X$	139
7.6.	Involutivity of the Supports of Coherent $\widehat{\mathcal{E}}$ -modules	147
Chapter 8.	Microlocal Analysis of Holonomic Systems	153
8.1.	Simple $\widehat{\mathcal{E}}$ -modules	153
8.2.	Quantized Contact Transformation	153
8.3.	Subprincipal Symbols	159
8.4.	Preparation for the Classification of Simple Holonomic Systems	161
8.5.	Classification of Simple Holonomic Systems (1)	168
8.6.	Principal Symbols of Simple Holonomic Modules	170
8.7.	Regular Holonomic $\widehat{\mathcal{E}}_X$ -modules	176
8.8.	Classification of Simple Holonomic Systems (2)	181
8.9.	Subholonomic Systems	186
Chapter 9.	Microlocal Calculus of b -functions	191
9.1.	Microlocal b -functions	191

9.2.	Existence of Microlocal b -functions	196
9.3.	Simple Intersection of Lagrangian Analytic Subsets	200
9.4.	Relation of b -functions of Two Lagrangian Analytic Subsets with a Good Intersection	201
9.5.	b -functions of Relative Invariants	205
Appendix		213
A.1.	Finiteness of Filtered Rings and Their Modules	213
A.2.	Derived Categories	226
A.3.	Derived Functors on Categories of Modules	239
A.4.	Symplectic Manifolds	243
Bibliography		247
Index		251
Index of Notations		253
