

# Contents

<b>1</b>	<b>Motivations, plan and statements</b>	<b>1</b>
1.1	Combinatorial realizations of topological categories . . . . .	1
1.2	Branched standard spines and an outline of the construction . . . . .	3
1.3	Graphic encoding . . . . .	5
1.4	Statements of representation theorems . . . . .	5
1.5	Existing literature and outline of contents . . . . .	10
<b>2</b>	<b>A review on standard spines and o-graphs</b>	<b>13</b>
2.1	Encoding 3-manifolds by o-graphs . . . . .	13
2.2	Reconstruction of the boundary . . . . .	17
2.3	Surgery presentation of a mirrored manifold and ideal triangulations . . . . .	20
<b>3</b>	<b>Branched standard spines</b>	<b>23</b>
3.1	Branchings on standard spines . . . . .	23
3.2	Normal o-graphs . . . . .	26
3.3	Bicoloration of the boundary . . . . .	28
3.4	Examples and existence results . . . . .	32
3.5	Matveev-Piergallini move on branched spines . . . . .	37
<b>4</b>	<b>Manifolds with boundary</b>	<b>40</b>
4.1	Oriented branchings and flows . . . . .	40
4.2	Extending the flow to a closed manifold . . . . .	45
4.3	Flow-preserving calculus: definitions and statements . . . . .	47
4.4	Branched simple spines . . . . .	50
4.5	Restoring the standard setting . . . . .	55
4.6	The MP-move which changes the flow . . . . .	60
<b>5</b>	<b>Combed closed manifolds</b>	<b>64</b>
5.1	Simple vs. standard branched spines . . . . .	64
5.2	The combed calculus . . . . .	69
<b>6</b>	<b>More on combings, and the closed calculus</b>	<b>73</b>
6.1	Comparison of vector fields up to homotopy . . . . .	73
6.2	Pontrjagin moves for vector fields, and complete classification . . . . .	76
6.3	Combinatorial realization of closed manifolds . . . . .	81

<b>7</b>	<b>Framed and spin manifolds</b>	<b>85</b>
7.1	The Euler cochain . . . . .	85
7.2	Framings of closed manifolds . . . . .	87
7.3	The framing calculus . . . . .	91
7.4	Spin structures on closed manifolds . . . . .	94
7.5	The spin calculus . . . . .	95
<b>8</b>	<b>Branched spines and quantum invariants</b>	<b>98</b>
8.1	More on spin structures . . . . .	98
8.2	A review of recoupling theory and Reshetikhin-Turaev-Witten invariants	99
8.3	Turaev-Viro invariants . . . . .	101
8.4	An alternative computation of TV invariants . . . . .	104
<b>9</b>	<b>Problems and perspectives</b>	<b>108</b>
9.1	Internal questions . . . . .	108
9.2	Questions on invariants . . . . .	110
9.3	Questions on geometric structures . . . . .	116
<b>10</b>	<b>Homology and cohomology computations</b>	<b>121</b>
10.1	Homology, cohomology and duality . . . . .	121
10.2	More homological invariants . . . . .	123
10.3	Evenly framed knots in a spin manifold . . . . .	125
	<b>Bibliography</b>	<b>127</b>
	<b>Index</b>	<b>131</b>
