

Contents

Introduction	vii
1 Examples and Definition of Foliations	1
2 Foliations of Codimension One	7
3 Holonomy, Second Fundamental Form, Mean Curvature	17
4 Basic Forms, Spectral Sequence, Characteristic Form	33
5 Transversal Riemannian Geometry	43
6 Flows	69
7 Hodge Theory for the Transversal Laplacian	81
8 Cohomology Vanishing and Tautness	99
9 Lie Foliations	107
10 Structure of Riemannian Foliations	113
11 Spectral Geometry of Riemannian Foliations	117
12 Foliations as Noncommutative Spaces	129
13 Infinite-Dimensional Riemannian Foliations	133
References on Riemannian Foliations	139
Appendix A Books and Surveys on Particular Aspects of Foliations	167
Appendix B Proceedings of Conferences and Symposia devoted to Foliations	171
Appendix C Bibliography on Foliations. This should be a reasonably complete list of all papers on the subject of foliations up to 1995	175
Appendix D Numbers of papers on foliations published during consecutive five year periods up to 1995	303
Index of Subjects	304
Index of Notations	305
