Preface	v
PART I THE LINE AND THE PLANE	
Chapter 1 What Topology Is About	3
Topological Equivalence	3
Continuity and Convergence	7
A Few Conventions	11
Extra: Topological Diversions	14
Exercises	18
Chapter 2 Axioms for \mathbb{R}	23
Extra: Axiom Systems	33
Exercises	34
Chapter 3 Convergent Sequences and Continuity	36
Subsequences	36
Uniform Continuity	41
The Plane	43
Extra: Bolzano (1781–1848)	48
Exercises	49
Chapter 4 Curves in the Plane	52
Curves	52
Homeomorphic Sets	61
Brouwer's Theorem	66
Extra: L.E.J. Brouwer (1881–1966)	75

Exercises	76
PART II METRIC SPACES	
Chapter 5 Metrics	81
Extra: Camille Jordan (1838–1922)	93
Exercises	95
Chapter 6 Open and Closed Sets	99
Subsets of a Metric Space	99
Collections of Sets	104
Similar Metrics	108
Interior and Closure	110
The Empty Set	111
Extra: Cantor (1845–1918)	112
Exercises	113
Chapter 7 Completeness	117
Extra: Meager Sets and the Mazur Game	124
Exercises	126
Chapter 8 Uniform Convergence	129
Extra: Spaces of Continuous Functions	139
Exercises	141
Chapter 9 Sequential Compactness	144
Extra: The p -adic Numbers	150
Exercises	153
Chapter 10 Convergent Nets	156
Inadequacy of Sequences	157
Convergent Nets	161
Extra: Knots	165
Exercises	167
Chapter 11 Transition to Topology	171
Generalized Convergence	171
Topologies	178
Extra: The Emergence of the Professional Mathematician	182
Exercises	183
PART III TOPOLOGICAL SPACES	
Chapter 12 Topological Spaces	187
Extra: Map Coloring	197
Exercises	199
Chapter 13 Compactness and the Hausdorff Property	202
Compact Spaces	202

Hausdorff Spaces	209
Extra: Hausdorff and the Measure Problem	212
Exercises	213
Chapter 14 Products and Quotients	215
Product Spaces	216
Quotient Spaces	219
Extra: Surfaces	226
Exercises	228
Chapter 15 The Hahn-Tietze-Tong-Urysohn Theorems	231
Urysohn's Lemma	231
Interpolation and Extension	237
Extra: Nonstandard Mathematics	243
Exercises	246
Chapter 16 Connectedness	249
Connected Spaces	250
The Jordan Theorem	256
Extra: Continuous Deformation of Curves	266
Exercises	268
Chapter 17 Tychonoff's Theorem	270
Extra: The Axiom of Choice	276
Exercises	281
PART IV POSTSCRIPT	
Chapter 18 A Smorgasbord for Further Study	285
Countability Conditions	286
Separation Conditions	287
Compactness Conditions	288
Compactifications	288
Connectivity Conditions	289
Extra: Dates from the History of General Topology	290
Exercises	292
Chapter 19 Countable Sets	295
Extra: The Continuum Hypothesis	301
A Farewell to the Reader	304
Literature	306
Index of Symbols	307
Index of Terms	309
