Preface	xi
1 Lagrange Spaces of Order 1	1
1.1 The Manifold $\text{Osc}^1 M$. Sprays.	2
1.2 Nonlinear Connections.	7
1.3 N -Linear Connections.	12
1.4 d -Tensors of Torsion and Curvature.	16
1.5 Parallelism. Structure Equations.	21
1.6 Lagrange Spaces.	24
1.7 Variational Problem.	25
1.8 A Noether Theorem.	28
1.9 Canonical Nonlinear Connection of a Lagrange Space.	30
1.10 Canonical Metrical Connection.	32
1.11 Finsler Spaces.	35
1.12 Generalized Lagrange Spaces.	37
1.13 Almost Kählerian Model of the Space L^n	40
1.14 Problems	42
2 The Geometry of 2-Osculator Bundle	45
2.1 The Fibre Bundle $\text{Osc}^2 M$	45
2.2 Vertical Distributions. Liouville Vector Fields.	49
2.3 2-Tangent Structure. 2-Sprays.	52
2.4 Nonlinear Connections.	56
2.5 J -Vertical Distributions.	60
2.6 The Dual Coefficients of a Nonlinear Connection.	62
2.7 Determination of a Nonlinear Connection from a 2-Spray.	68

2.8	The Almost Product Structure \mathbb{P} . The Almost n -Contact Structure \mathbb{F} .	70
2.9	Problems	74
3	<i>N</i>-Linear Connections.	
	Structure Equations.	75
3.1	The Algebra of d -Tensor Fields.	75
3.2	N -Linear Connection on $\text{Osc}^2 M$.	78
3.3	The Coefficients of the N -Linear Connections.	81
3.4	d -Tensors of Torsion.	86
3.5	d -Tensors of Curvature.	90
3.6	Structure Equations of an N -Linear Connection.	100
3.7	Problems	106
4	Lagrangians of Second Order. Variational Problem.	
	Nöther Type Theorems.	107
4.1	Lagrangians of Second Order. Zermelo Conditions.	108
4.2	Variational Problem	110
4.3	Operators $\overset{1}{I}_V$, $\overset{2}{I}_V$, $\frac{dV}{dt}$	113
4.4	Craig–Synge Covectors	116
4.5	The Energies $\mathcal{E}_c(L)$, $\overset{2}{\mathcal{E}}_c(L)$	119
4.6	Nöther Theorems	123
4.7	Jacobi–Ostrogradski Momenta	126
4.8	Regular Lagrangians. Canonical Nonlinear Connections	130
4.9	Prolongation to $\text{Osc}^2 M$ of the Riemannian Structures	134
4.10	Prolongation to $\text{Osc}^2 M$ of the Finslerian and Lagrangian Structures	136
4.11	Problems	139
5	Second Order Lagrange Spaces	141
5.1	The Notion of Lagrange Space of Order 2	141
5.2	Euler–Lagrange Equations of a Lagrange Space $L^{(2)n}$	144

5.3	Canonical Nonlinear Connections	146
5.4	Canonical Metrical N -Connections	150
5.5	Problems	152
6	Geometry of the k-Osculator Bundle	153
6.1	The Notion of k -Osculator Bundle	153
6.2	Vertical Distributions. Liouville Vector Fields.	157
6.3	k -Tangent Structure; k -Sprays.	160
6.4	Nonlinear Connections.	163
6.5	J -Vertical Distributions.	166
6.6	The Dual Coeficients of a Nonlinear Connection N on $\text{Osc}^k M$	168
6.7	The Determination of a Nonlinear Connection from a k -Spray. The Structures \mathbb{P} and \mathbb{F}	174
6.8	Problems	177
7	Linear Connections on $\text{Osc}^k M$	179
7.1	d -Tensors Algebra	179
7.2	N -Linear Connection	182
7.3	N -Linear Connections in Adapted Basis	185
7.4	d -Tensors of Torsion	188
7.5	d -Tensors of Curvature	191
7.6	The d -Tensors of Curvature in Adapted Basis	193
7.7	The Structure Equations	199
7.8	Problems	202
8	Lagrangians of Order k. Applications to Higher- Order Analytical Mechanics.	203
8.1	Lagrangians of Order k . Zermello Conditions.	203
8.2	Variational Problem	205
8.3	Operators $\frac{dv}{dt}, I_V^1, \dots, I_V^k$	208
8.4	Craig-Synge Covectors	210

8.5	Energies of Higher Order	212
8.6	Noether Theorems	215
8.7	Jacobi–Ostrogradski Momenta	219
8.8	Regular Lagrangians. Canonical Nonlinear Connection	223
8.9	Problems	226
9	Prolongation of the Riemannian, Finslerian and Lagrangian Structures to the k-Osculator Bundle	227
9.1	Prolongation to $\text{Osc}^k M$ of the Riemannian Structures	227
9.2	Prolongation to the k -Osculator Bundle of the Finslerian Structures	233
9.3	Prolongation to $\text{Osc}^k M$ of a Lagrangian Structure	238
9.4	Remarkable Regular Lagrangians of Order k	239
9.5	Problems	242
10	Higher Order Lagrange Spaces	243
10.1	The Definition of the Space $L^{(k)n}$	244
10.2	Canonical Metrical N -Connections	249
10.3	The Riemannian $(k - 1)n$ -Contact Model of the Space $L^{(k)n}$	254
10.4	The Gravitational and Electromagnetic Fields in $L^{(k)n}$	256
10.5	The Generalized Lagrange Spaces of Order k	260
10.6	Problems	263
11	Subspaces in Higher Order Lagrange Spaces	265
11.1	Submanifolds in $\text{Osc}^k M$	265
11.2	Subspaces in the Lagrange Space of Order k , $L^{(k)} M$	268
11.3	Induced Nonlinear Connection	270
11.4	The Relative Covariant Derivative	274
11.5	The Gauss–Weingarten Formulae	279

11.6	The Gauss–Codazzi Equations	282
11.7	Problems	284
12	Gauge Theory in the Higher Order Lagrange Spaces	285
12.1	Gauge Transformations in Principal Bundles	286
12.2	Gauge k -Osculator Bundles	287
12.3	The Local Representation of Gauge Transformations	290
12.4	Gauge d -Tensor Fields. Gauge Nonlinear Connections	295
12.5	Gauge N -Linear Connections and Gauge h - and v^α -Covariant Derivatives	299
12.6	Einstein–Yang–Mills Equations	301
12.7	Gauge Invariance of the Lagrangians of Order k	304
