<i>Preface</i>	v
<b>1 The Variation Formulas and Some Consequences</b>	<b>1</b>
1.1 The Minimal Surface Equation and Minimal Submanifolds	1
1.2 Some Simple Examples of Minimal Surfaces in $\mathbb{R}^3$	6
1.3 Consequences of the First Variation Formula	7
1.4 The Gauss Map	11
1.5 The Theorem of Bernstein	13
1.6 The Strong Maximum Principle	15
1.7 Second Variation Formula, Morse Index, and Stability	16
<b>2 Curvature Estimates and Consequences</b>	<b>25</b>
2.1 Simons' Inequality	25
2.2 Curvature Estimates for Minimal Surfaces	30
2.3 $L^p$ Bounds of $ A ^2$ for Stable Hypersurfaces	38
2.4 Bernstein Theorems and Curvature Estimates	39
2.5 Minimal Cones	40
<b>3 Weak Bernstein-Type Theorems</b>	<b>43</b>
3.1 The Theory of Varifolds	43
3.2 The Weak Bernstein-Type Theorem	50
3.3 General Constructions	51
3.4 Finite Dimensionality	55
<b>4 Existence Results</b>	<b>59</b>
4.1 The Plateau Problem	59
4.2 The Dirichlet Problem	61
4.3 The Solution to the Plateau Problem	65
4.4 Preliminary Discussion of Branch Points	68
4.5 Unique Continuation	68
4.6 Local Description of Nodal and Critical Sets	74
4.7 The Absence of True Branch Points	81
4.8 The Absence of False Branch Points	83
4.9 Embedded Solutions of the Plateau Problem	89

	<b>5 Minimal Surfaces in Three-Manifolds</b>	<b>99</b>
5.1	The Minimal Surface Equation in a Three-Manifold	99
5.2	Compactness Theorems with A Priori Bounds	105
5.3	Convergence of Embedded Minimal Surfaces	111
5.4	Complete Embedded Minimal Surfaces in $\mathbb{R}^3$	118
	<i>Bibliography</i>	121
