Preface 13

Acknowledgments from Earlier Editions 17

PART ONE STOCKS AND THEIR VALUE

1. Firm Foundations and Castles in the Air 23

What Is a Random Walk? 24

Investing as a Way of Life Today 26

Investing in Theory 28

The Firm-Foundation Theory 29

The Castle-in-the-Air Theory 31

How the Random Walk Is to Be Conducted 33

2. The Madness of Crowds 35

The Tulip-Bulb Craze 36

The South Sea Bubble 39

The Florida Real Estate Craze 45

Wall Street Lays an Egg 46

An Afterword 53

3. Stock Valuation from the Sixties through the Nineties 55

The Sanity of Institutions 55

The Soaring Sixties 57

The New "New Era": The Growth-Stock/New-Issue Craze 57

Synergy Generates Energy: The Conglomerate Boom 61

Performance Comes to the Market: The Bubble in Concept Stocks 69

The Sour Seventies 73

The Nifty Fifty 73

The Roaring Eighties 76

The Triumphant Return of New Issues 76

Concepts Conquer Again: The Biotechnology Bubble 78

The Chinese Romance with the Lycoris Plant 80

Some Other Bubbles of the 1980s 81

What Does It All Mean? 85

The Nervy Nineties 85

The Japanese Yen for Land and Stocks 85

The Internet Craze of the Late 1990s 90

A Final Word 94

4. The Firm-Foundation Theory of Stock Prices 95

The “Fundamental” Determinants of Stock Prices 96

Two Important Caveats 103

Testing the Rules 106

One More Caveat 108

What’s Left of the Firm Foundation? 111

PART TWO HOW THE PROS PLAY THE BIGGEST GAME IN TOWN

5. Technical and Fundamental Analysis 117

Technical versus Fundamental Analysis 118

What Can Charts Tell You? 119

The Rationale for the Charting Method 124

Why Might Charting Fail to Work? 126

From Chartist to Technician 127

The Technique of Fundamental Analysis 128

Why Might Fundamental Analysis Fail to Work? 132

Using Fundamental and Technical Analysis Together 134

6. Technical Analysis and the Random-Walk Theory 138

Holes in Their Shoes and Ambiguity in Their Forecasts 138

Is There Momentum in the Stock Market? 140

Just What Exactly Is a Random Walk? 142

Some More Elaborate Technical Systems 145

The Filter System 146

The Dow Theory 146

The Relative-Strength System 147

Price-Volume Systems 148

Reading Chart Patterns 148

Randomness Is Hard to Accept 149

A Gaggle of Other Technical Theories to Help You

Lose Money 150

The Hemline Indicator 151
The Super Bowl Indicator 153
The Odd-Lot Theory 153
A Few More Systems 155

Technical Market Gurus 155
 Why Are Technicians Still Hired? 159
 Appraising the Counterattack 160
 Implications for Investors 163

7. How Good Is Fundamental Analysis? 165

The Views from Wall Street and Academia 166
 Are Security Analysts Fundamentally Clairvoyant? 166
 Why the Crystal Ball Is Clouded 170

1. *The Influence of Random Events* 171
2. *The Creation of Dubious Reported Earnings through "Creative" Accounting Procedures* 172
3. *The Basic Incompetence of Many of the Analysts Themselves* 174
4. *The Loss of the Best Analysts to the Sales Desk or to Portfolio Management* 177

Do Security Analysts Pick Winners? The Performance of the Mutual Funds 178
 Can Any Fundamental System Pick Winners? 186
 The Verdict on Market Timing 187
 The Semi-strong and Strong Forms of the Random-Walk Theory 190
 The Middle of the Road: A Personal Viewpoint 193

PART THREE THE NEW INVESTMENT TECHNOLOGY

8. A New Walking Shoe: Modern Portfolio Theory 199

The Role of Risk 200
 Defining Risk: The Dispersion of Returns 201
 Exhibit 201

Expected Return and Variance: Measures of Reward and Risk 201

Documenting Risk: A Long-Run Study 204
 Reducing Risk: Modern Portfolio Theory (MPT) 206
 Diversification in Practice 211

9. Reaping Reward by Increasing Risk 220

Beta and Systematic Risk 221

- The Capital-Asset Pricing Model (CAPM) 224
- Let's Look at the Record 229
- An Appraisal of the Evidence 232
 - The Quant Quest for Better Measures of Risk: Arbitrage Pricing Theory* 234
- A Summing Up 237

10. The Assault on the Random-Walk Theory: Is the Market Predictable after All? 240

- Predictable Patterns in the Behavior of Stock Prices 242
 1. *Stocks Do Sometimes Get on One-Way Streets* 243
 2. *But Eventually Stock Prices Do Change Direction and Hence Stockholder Returns Tend to Reverse Themselves* 244
 3. *Stocks Are Subject to Seasonal Moodiness, Especially at the Beginning of the Year and the End of the Week* 247
- Predictable Relationships between Certain "Fundamental" Variables and Future Stock Prices 249
 1. *Smaller Is Often Better* 249
 2. *Stocks with Low Price-Earnings Multiples Outperform Those with High Multiples* 251
 3. *Stocks that Sell at Low Multiples of Their Book Values Tend to Produce Higher Subsequent Returns* 253
 4. *Higher Initial Dividends and Lower Price-Earnings Multiples Have Meant Higher Subsequent Returns* 254
 5. *The "Dogs of the Dow" Strategy* 258
- And the Winner Is. . . 259
 - The Performance of Professional Investors* 259
- Concluding Comments 267
- Appendix: The Market Crash of October 1987 270

PART FOUR A PRACTICAL GUIDE FOR RANDOM WALKERS AND OTHER INVESTORS

11. A Fitness Manual for Random Walkers 277

- Exercise 1: Cover Thyself with Protection 278
- Exercise 2: Know Your Investment Objectives 281
- Exercise 3: Dodge Uncle Sam Whenever You Can 289
 - Pension Plans and IRAs* 289
 - Keogh Plans* 290
 - Roth IRAs* 293

Tax-Deferred Annuities 294

- Exercise 4: Be Competitive; Let the Yield on Your Cash Reserve
Keep Pace with Inflation 295
- Money-Market Mutual Funds* 295
- Money-Market Deposit Accounts* 297
- Bank Certificates* 299
- Tax-Exempt Money-Market Funds* 300
- Exercise 5: Investigate a Promenade through Bond Country 301
- Zero-Coupon Bonds Can Generate Large Future Returns* 302
- No-Load Bond Funds Are Appropriate Vehicles for Individual
Investors* 303
- Tax-Exempt Bonds Are Useful for High-Bracket Investors* 305
- Hot TIPS: Inflation Indexed Bonds* 307
- Should You Be a Bond-Market Junkie?* 309
- Exercise 6: Begin Your Walk at Your Own Home; Renting Leads
to Flabby Investment Muscles 310
- Exercise 7: Beef Up with Real Estate Investment Trusts 313
- Exercise 8: Tiptoe through the Investment Fields of Gold and
Collectibles 318
- Exercise 9: Remember that Commission Costs Are Not Random;
Some Are Cheaper than Others 322
- Exercise 10: Diversify Your Investment Steps 324
- A Final Checkup 324

12. Handicapping the Financial Race: A Primer in Understanding and Projecting Returns from Stocks and Bonds 326

- What Determines the Returns from Stocks and Bonds? 326
- Three Eras of Financial Market Returns 331
- Era I: The Age of Comfort* 333
- Era II: The Age of Angst* 334
- Era III: The Age of Exuberance* 340
- The Age of the Millennium 342
- Appendix: Projecting Returns for Individual Stocks 347

13. A Life-Cycle Guide to Investing 351

- Four Asset Allocation Principles 352
1. *Risk and Reward Are Related* 352
 2. *Your Actual Risk in Stock and Bond Investing Depends on the Length of Time You Hold Your Investment* 353

3. *Dollar-Cost Averaging Can Reduce the Risks of Investing in Stocks and Bonds* 356

4. *The Risks You Can Afford to Take Depend on Your Total Financial Situation* 360

Three Guidelines to Tailoring a Life-Cycle Investment Plan 362

1. *Specific Needs Require Dedicated Specific Assets* 363

2. *Recognize Your Tolerance for Risk* 363

3. *Persistent Savings in Regular Amounts, No Matter How Small, Pays Off* 367

The Life-Cycle Investment Guide 368

14. Three Giant Steps Down Wall Street 372

The No-Brainer Step: Investing in Index Funds 373

The Index Fund Solution: A Summary 375

A Broader Definition of Indexing 378

A Specific Index Fund Portfolio 382

The Tax-Managed Index Fund 383

The Do-It-Yourself Step: Potentially Useful Stock-Picking Rules 386

The Substitute-Player Step: Hiring a Professional Wall-Street Walker 391

Risk Level 394

Unrealized Gains 394

Expense Ratios 395

The Morningstar Mutual-Fund Information Service 395

A Primer on Mutual-Fund Costs 398

Loading Fees 399

Expense Charges 399

Comparing Mutual-Fund Costs 400

The Malkiel Step 401

A Paradox 405

Some Last Reflections on Our Walk 406

A Random Walker's Address Book and Reference Guide to Mutual Funds 409

Bibliography 429

Index 445
